The Elements of Academic Research Richard H. McCuen, 1996-01-01 Students and graduate students who are beginning to do research often have many difficult questions and concerns. This book is designed to give a comprehensive reader friendly overview of all the key aspects of conducting and presenting research. It includes chapters on topic selection, time management using the information highway, getting your research published, and more. Humorous research related illustrations enhance the text. Students as well as the faculty who work with them will find this book to be an invaluable research tool.

Stock-taking report: food biotechnology communication materials in the world Food and Agriculture Organization of the United Nations, 2020-10-27 During the Global Community Meeting on the FAO GM Foods Platform held in September 2019 many participants expressed the strong need for a set of impartial and science based communication materials that would address the communication challenges at a national level around food biotechnologies. To address this need FAO in collaboration with Kenya's National Biosafety Authority and scientific and consumer education communication experts initiated the process of developing a communication toolkit on food biotechnologies. The toolkit is to be used by governmental agencies that assess the safety of foods derived from biotechnologies to better communicate with the general public. The toolkit will contain a series of guiding documents with various sample materials. The target users of the toolkit itself are the food safety and biosafety competent authorities in the government sector whereas the sample materials are for the general public. A step by step approach has been planned to develop the sample materials with the first steps being the analysis of existing consumer education and communication materials worldwide, the identification of gaps in the information that is needed for consumers to gain a better understanding and the selection of consumer education and communication materials to be used as a basis to develop sample materials. This document summarizes these initial steps.
