

Benefits

- High performance VSAT supporting up to 24Mbps / 24Mbps
- Unified central management for mixed TDMA and SCPC network
- On-Demand inbound switchover between SCPC continuous carrier and TDMA burst mode
- Bi-directional advanced adaptive transmissions for maximum availability
- Best for video, cellular backhaul, and high throughput applications
- Standards-based VSAT: DVB-S2 and DVB-RCS with enhanced functionality

High Performance Multi-Mode VSAT

SkyEdge II Accent supports very high throughput services through both MF-TDMA and SCPC (continuous) mode carriers. The SkyEdge II Accent modem supports fast switchover between the two transmission modes. SkyEdge II Accent is designed for applications that require high throughput in both directions. It is ideal for cellular backhauling, ISP PoP locations, video contribution, and other bandwidth intensive applications.

Maximum Efficiency and Availability

SkyEdge II Accent provides superior space segment bandwidth efficiency and enables high link availability through the use of DVB-S2 ACM (Adaptive Coding and Modulation) both in the outbound and inbound paths. For non-bursty traffic, the continuous carrier in the inbound direction has the advantage of 50% less space segment than TDMA Access. In addition, SkyEdge II Accent enables operators to share a large outbound carrier among all TDMA and SCPC VSATs increasing the statistical bandwidth multiplexing for best bandwidth efficiency.

Single Management System

SkyEdge II Accent is an additional member of the SkyEdge II family of VSATs. Accent, like other SkyEdge II VSATs, is managed via the SkyEdge II network management system (NMS). This architecture provides operators with a single management system to control, monitor and configure both TDMA and SCPC services on the same platform.

Feature Rich Terminal

SkyEdge II Accent comes with all the embedded IP routing, QoS, TCP and HTTP acceleration technologies that are available on the SkyEdge II platform. In addition, the Accent includes a micro SD memory slot for optional multi-GByte add-on required to support Gilat's CacheModel technology. With CacheModel enabled, the Accent is able to store web content on its on-board cache memory enabling an even faster web browsing experience.
