

# GILGEN CLOSING DEVICE BSV-FT

## Reliable closing in the event of a fire alarm

### Application possibilities

The independent closing device BSV-FT can be attached to a top-hung or bottom-hung recessing free-ringed single sliding door leaf. Power transmission is ensured via a continuous cable drive system. Thanks to its small size, the system can be mounted in different positions, depending on the particular situation and available space (door, wall, ceiling).

### Function

The door is opened by hand. The integrated holding brake of the BSV-FT keeps the door in the open position. Thanks to the free-wheel function, the door can be easily actuated by hand in the everyday operating mode. As soon as a fire alarm is triggered, or in the event of a power failure, the holding brake is released and the door is automatically closed. The adjustable speed regulation feature guarantees a constant and controlled closing motion.

### Manual opening

Following a fire alarm or a mains failure, the door remains closed. It can be manually opened, upon which it is automatically closed, resuming the fire protection function.

### Available additional elements

- Push-button CL001 door
- Control BSV-FT
- Fire detector
- Additional fixing angle
- Door stop buffer
- Additional cable guide pulley

The Gilgen closing device BSV-FT is designed as a power-driven independent device of the manual free-ringed single sliding door leaf.
