Science of Life: Biology Parent Lesson Plan ,2013-08-01 The Science of Life Biology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Intro to Science Have you ever wondered about human fossils cave men skin color ape men or why missing links are still missing Want to discover when T Rex was small enough to fit in your hand Or how old dinosaur fossils are and how we know the age of these bones Learn how the Bibles world view not evolution s unites evidence from science and history into a solid creation foundation for understanding the origin history and destiny of life including yours In Building Blocks in Science Gary Parker explores some of the most interesting areas of science fossils the errors of evolution the evidences for creation all about early man and human origins dinosaurs and even races Learn how scientists use evidence in the present how historians use evidence of the past and discover the biblical world view not evolution that puts the two together in a credible and scientifically sound way Semester 2 Life Science Study clear biological answers for how science and Scripture fit together to honor the Creator Have you ever wondered about such captivating topics as genetics the roll of natural selection embryonic development or DNA and the magnificent origins of life Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process Life Science (Teacher Guide) Dr. Carl Werner,2018-05-17 Chapter Discussion Question Teachers are encouraged to participate with the student as they complete the discussion questions The purpose of the Chapter Purpose section is to introduce the chapter to the student The Discussion Questions are meant to be thought provoking The student may not know the answers but should answer with their thoughts ideas and knowledge of the subject using sound reasoning and logic They should study the answers and compare them with their own thoughts We recommend the teacher discuss the questions the student s answers and the correct answers with the student This section should not be used for grading purposes DVD Each DVD is watched in its entirety to familiarize the student with each book in the course They will watch it again as a summary as they complete each book Students may also use the DVD for review as needed as they complete each chapter of the course Chapter Worksheets The worksheets are foundational to helping the student learn the material and come to a deeper understanding of the concepts presented Often the student will compare what we should find in the fossil record and in living creatures if evolution were true with what we actually find This comparison clearly

shows evolution is an empty theory simply based on the evidence God's Word can be trusted and displayed both in the fossil record and in living creatures

Tests and Exams There is a test for each chapter sectional exams and a comprehensive final exam for each book

Darwin-Inspired Learning Carolyn J. Boulter, Michael J. Reiss, Dawn L. Sanders, 2015-01-19 Charles Darwin has been extensively analysed and written about as a scientist Victorian father and husband However this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice The ways in which Darwin developed his scientific ideas and their far reaching effects continue to challenge and provoke contemporary teachers and learners inspiring them to consider both how scientists work and how individual humans read nature Darwin inspired learning as proposed in this international collection of essays is an enquiry based pedagogy that takes the professional practice of Charles Darwin as its source Without seeking to idealise the man Darwin inspired learning places importance on active learning hands on enquiry critical thinking creativity argumentation interdisciplinarity In an increasingly urbanised world first hand observations of living plants and animals are becoming rarer Indeed some commentators suggest that such encounters are under threat and children are living in a time of nature deficit Darwin inspired learning with its focus on close observation and hands on enquiry seeks to re engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science
