[Migration and Language Education in Southern Europe](#) Eleni Griva, Maria Moutzi, Marina Mattheoudakis, 2021-10-04 The entry of migrant populations to Europe and especially to countries of Southern Europe is expected to drastically change the make up of state school classes as learners of various ages ethnic backgrounds and mother tongues are going to co exist within the same educational setting In Greece in particular the

landscape of education has already started changing as a significant number of immigrant students have joined mainstream classrooms This volume maps this new educational reality and its challenges as Greek teachers are required with very limited training and resources to address those students educational and socio emotional needs All chapters are authored by Greek researchers who are actively involved in the study of refugees and immigrants education their needs and their educational linguistic and political rights Despite the fact that education for immigrants and refugees has become the focus of much research on a global level the ongoing rapid rise of immigrant populations in Southern Europe has not been adequately researched This book consequently meets the need for further research and empirical studies in this field **Subject**
