Question 1 of 8

You are a new manager at Kindig Precision Machinery. Your director, Kurt, has asked you to manage a project team tasked with reducing excessive costs and wasteful duplication. Kurt gives you his view of the project goals, explicitly outlines the responsibilities, and suggests some individuals you should consider for your team. What is your most important first step?

Determine the project objectives.

Good choice! Your first step will be to define the projects objectives and the underlying problems. A successful project begins with clearly defined objectives. Be sure you know which problems your project aims to solve—and which problems it's not meant to address.

Question 2 of 8

You are the manager of a project facing very tight and critical deadlines. Senior management has reviewed and approved your schedule. Halfway through the project, however, one of your suppliers reports that it cannot meet its deliverable date unless it reduces the quality of the materials you've ordered. What should you do next?

Consult with your stakeholders to see if a change in quality is acceptable.

Good choice! Before you make a trade-off that reduces quality, it is crucial to get buy in from stakeholders.

Question 3 of 8

You work for a successful regional bank. You have been assigned to develop a new loyalty rewards program and integrate it throughout the bank. You need a reporting tool that will help each department monitor how its part of the product launch affects other departments—and how it is affected by other departments. Which scheduling tool would be the most appropriate?

A PERT chart.

Good choice! The PERT chart shows all tasks in progress at a given time and all the dependencies between outcomes, tasks, and events. Thus, they are useful for assessing the impact of a change in one area on the rest of a project.
