Designing Pornotopia Rick Poynor, 2006

Following the discussion of Poynor's previous anthology *Obey the Giant* *Designing Pornotopia* covers a wide area of subjects from magazines billboard advertising branding illustration photography tattoos and music graphics to architecture and includes interviews with architect Rem Koolhaas and maverick American graphic designer and performance artist Elliott Earls. Along the way Poynor reassesses the early work of Peter Saville and tracks the seemingly unstoppable rise of Stefan Sagmeister among other graphic designers. Poynor's concise riveting prose constantly challenges the reader with strong and through provoking arguments.

The SAGE Handbook of Architectural Theory C. Greig Crysler, Stephen Cairns, Hilde Heynen, 2012-01-10

The SAGE Handbook of Architectural Theory documents and builds upon some of the most innovative developments in architectural theory over the last two decades. Bringing into dialogue a range of geographically institutionally and historically competing positions the book examines and explores parallel debates in related fields. The book is divided into eight sections: Power, Difference, Embodiment, Aesthetics, Pleasure, Excess, Nation, Spectacle, Modernity, History, Memory, Tradition, Design, Practice, Production, Technology, Science, Virtuality, Nature, Landscape, Sustainability, City, Metropolis, Territory. Creating openings for future lines of inquiry and establishing the basis for new directions for education, research and practice the book organizes itself around specific case studies to provide a critical interpretive and speculative enquiry into the relevant debates in architectural theory. A methodical authoritative and comprehensive addition to the literature the Handbook is suitable for academics, researchers and practitioners in architecture, urban geography, cultural studies, sociology and geography.

Retailising Space Prof Dr Mattias Kärrholm, 2013-06-28

Over the past few years there has been a proliferation of new kinds of retail space. Retail space has cropped up just about everywhere in the urban landscape in libraries, workplaces, churches and museums. In short, retail is becoming a more and more manifest part of the public domain. The traditional spaces of retail such as city centres and outlying shopping malls are either increasing in size or disappearing, producing new urban types and whole environments totally dedicated to retail. The creation of these new retail spaces has brought about a re and de territorialisation of urban public space and has also led to transformations in urban design and type of materials used and even in the logic and ways through which these design amenities meet the needs of retailers and/or consumers. This book describes how the retailisation of public domains affects our everyday life and our use of the built environment. Taking an architectural and territorial perspective on this issue it looks specifically at how retail and consumption spaces have changed and territorialised urban life in different ways. It then develops a methodology and a set of concepts to describe and understand the role of architecture in these territorial transformations.

One Nation Under Goods James J. Farrell, 2014-07-15

Loved and hated, visited and avoided seemingly everywhere yet endlessly the same

malls occupy a special place in American life What then is this invention that evokes such strong and contradictory emotions in Americans In many ways malls represent the apotheosis of American consumerism and this synthetic and wide ranging investigation is an eye popping tour of American culture s values and beliefs Like your favorite mall One Nation under Goods is a browser s paradise and in order to understand America s culture of consumption you need to make a trip to the mall with Farrell This lively fast paced history of the hidden secrets of the shopping mall explains how retail designers make shopping and goods irresistible Architects chain stores and mall owners relax and beguile us into shopping through water fountains ficus trees mirrors and covert security cameras From food courts and fountains to Santa and security Farrell explains how malls control their patrons and convince us that shopping is always an enjoyable activity And most importantly One Nation Under Goods shows why the mall s ultimate promise of happiness through consumption is largely an illusion It s all here for one low price of course *Catalogue of the Library of the Graduate School of Design, Harvard University* Harvard

Urban Transport Planning and Management Pratibha Deshmukh,2010 Transport or Transportation is the movement of people and goods from one location to another Transportation is performed by various modes such as air rail road and water The field can be divided into infrastructure vehicles and operations Infrastructure consists of the fixed installations necessary for transport and may be roads railways airways waterways canals and pipelines or terminals such as airports railway stations bus stations and seaports Vehicles travelling on the network include automobiles bicycles buses trains people and aircraft Transport within urbanised areas presents unique problems The density of an urban environment can create significant levels of road traffic which can impact businesses and increase pollution Parking space is another concern requiring the construction of large parking garages in high density areas which could be better used for other development Good planning uses transit oriented development which attempts to place higher densities of jobs or residents near high volume transportation The densities can cause traffic jams for automobiles yet are too low to be commercially served by trains or light rail systems The conventional solution is to use buses but these and light rail systems may fail where automobiles and excess road network capacity are both available achieving less than 1% ridership The purpose of this book is to sensitise all to issue of Urban Transport Planning and to discuss the steps which need to be taken by the government and all stakeholders of the transportation It gives a brief introduction on Transport and Transportation Networks and Urban

Planning It further showcases how to develop Imported or Intelligent Urban Transport Systems Problems and Challenges involved in it and at the need for Sustainable Green Urban Transport is discussed **Basics Urban Building Blocks** Thorsten Bürklin, Michael Peterek, 2008 Our cities and neighborhoods are composed of urban building blocks and a knowledge of these elementary components is part of the basic equipment of city planning It is absolutely essential for urban design that one understands their form and structure their functional conditions and the differentiation into private and public spheres as well as the ways they are networked into their surroundings Study of these city building blocks represents a first step toward understanding and successfully developing the built structure of the city as a physical and social habitat Themes are the row the block the courtyard the block in reverse the passageway the line the solitaire the group the shed **Enhancing Curricula** Allan Davies, 2002 **Assemblage**, 1998 **European Studies** Menno Spiering, Franco Bianchini, 2001 **On the Style Site** Ina Blom, 2007 This book takes its cue from a simple observation During the last 30 years or so the term style has all but disappeared from art critical or art historical terminology For new art history it was an increasingly problematic term associated with the taxonomist and historicist concerns of old art history not to speak of its fixation on the figure of the great artist For contemporary art criticism the term seemed simply irrelevant Faced with artistic activities that challenged traditional ideas of the work of art and its relation to aesthetics itself new critical paradigms had to be invented As interventions in social reality an art of actions and events replaced preoccupations with visual style and shape the politics of social sites replaced the language of forms But while style has all but disappeared from art historical and art critical discourse artistic practice since the 1960 s onwards has seemed increasingly focused on the stylistics of the life environment the way in which everyday life itself is formed designed or stylized This development calls for a new reading of the relationship between art and the question of style one that approaches the question of style itself not just as an art historical tool or method of explanation but as a social site in which relations between appearance recognition and social identity is negotiated The question or crisis of the contemporary style site is related to the significance of stylistic issues in contemporary politics and economics that capitalizes on life itself and that is perhaps best understood through its particular production of subjectivity The works discussed in this book treat style as precisely such a site and should therefore be discussed in extension of what is generally known as site specific practices in art However the style site works radically change the notion of the politics of this type of art and may in the end also contribute to open the question of the life art practices of the avant garde to new interpretations Ina Blom is an Associate Professor at the Department of Philosophy Classics History of Art and Ideas at the University of Oslo She has written extensively on modern and contemporary art and is also active as an art critic **Foodspace** Ursula Anderson Lang, 2005 **Environment and Planning**, 2005
