## Introduction

The Hawaii Early Learning Profile (HELP) is a comprehensive assessment tool used to evaluate the development of young children in Hawaii. It is designed to be used by early childhood educators and other professionals who work with children from birth to five years of age.

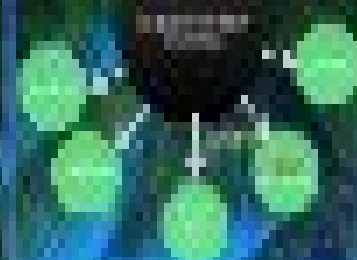

The HELP is a standardized assessment tool that is used to measure a child's development in various areas, including communication, motor skills, social interaction, and problem-solving. It is a valuable tool for identifying children who may have developmental delays or disabilities and for planning appropriate interventions.

## Developmental Areas and Domains

The HELP is organized into two main sections: Communication and Motor Skills. The Communication section is further divided into three domains: Receptive Language, Expressive Language, and Nonverbal Communication. The Motor Skills section is divided into two domains: Fine Motor Skills and Gross Motor Skills. Each domain contains a list of specific skills that are assessed.

## Test Administration

The HELP is administered by a trained professional who has received specific training in the use of the tool. The administrator should follow the instructions in the manual carefully to ensure that the assessment is conducted in a consistent and reliable manner. The assessment should be conducted in a quiet, distraction-free environment.
