## **Global Co Production Guide:**

**European Film and Television Co-production** Julia Hammett-Jamart, Petar Mitric, Eva Novrup Redvall, 2019-01-28 This volume offers an up to date analysis of film and television co production in Europe. It brings together the voices of policy professionals, industry practitioners and media industry scholars to trace the contours of a complex practice that is of increasing significance in the global media landscape. Analysis of the latest production statistics sits alongside interviews with producers and the critical evaluation of public film policies. The volume incorporates contributions from representatives of major public institutions Eurimages, the European Audiovisual Observatory and the European Commission and private production companies including the pan European Zentropa Group. Policy issues are elucidated through case studies including the Oscar winning feature film *Ida*, the BAFTA winning *I am not a Witch* and the Danish television serial *Ride Upon the Storm*. Scholarly articles span co development, co distribution and regional cinemas as well as emerging policy challenges such as the digital single market. The combination of qualitative and quantitative approaches and the juxtaposition of industry and scholarly voices provides a unique perspective on European co production that is information rich, complex and stimulating, making this volume a valuable companion for students, scholars and industry professionals.

## **The Routledge Encyclopedia of Films**

Sabine Haenni, Sarah Barrow, John White, 2014-09-15 The Routledge Encyclopedia of Films comprises 200 essays by leading film scholars analysing the most important, influential, innovative and interesting films of all time. Arranged alphabetically, each entry explores why each film is significant for those who study film and explores the social, historical and political contexts in which the film was produced. Ranging from Hollywood classics to international bestsellers to lesser known representations of national cinema, this collection is deliberately broad in scope, crossing decades, boundaries and genres. The encyclopedia thus provides an introduction to the historical range and scope of cinema produced throughout the world.

**Transnational Cinema in Europe** Manuel Palacio, Jörg Türschmann, 2013 The attempt to produce films for the international market has led to lively exchanges and meeting points between local and national identity discourses and global processes of identity formation. Co productions alone can no longer be seen as an incentive for national cultural production. Rather, it is necessary to regard co productions as a privileged site for an analysis of the relations between identity, nation and culture. Transnational Cinema in Europe is the result of a collaboration of two research groups in Madrid and Vienna. The book consists of articles by members of both research groups as well as by several other experts. Series: Contributions to the European Theater, Film and Media Studies. Beiträge zur europäischen Theater, Film und Medienwissenschaft. Vol. 4.
