*Predictive Markers in Cancer Progression* Susan Costantini Alfredo Budillon,Alfredo Budillon,2021-02-12 Biomarkers are of

critical medical importance for oncologists allowing them to predict and detect disease and to determine the best course of action for cancer patient care Prognostic markers are used to evaluate a patient's outcome and cancer recurrence probability after initial interventions such as surgery or drug treatments and hence to select follow up and further treatment strategies On the other hand predictive markers are increasingly being used to evaluate the probability of benefit from clinical

interventions driving personalized medicine Evolving technologies and the increasing availability of multiomics data are leading to the selection of numerous potential biomarkers based on DNA RNA miRNA protein and metabolic alterations within cancer cells or tumor microenvironment that may be combined with clinical and pathological data to greatly improve the prediction of both cancer progression and therapeutic treatment responses However in recent years few biomarkers have progressed from discovery to become validated tools to be used in clinical practice This Special Issue comprises eight review articles and five original studies on novel potential prognostic and predictive markers for different cancer types

### **Effects and Mechanisms of Bariatric Surgery**

**in Relieving Obesity and Its Complications** *Yayun Wang, Lidia Castagneto Gissey, Kaixiong Tao, 2025-02-19* As the living standard improves, the number of overweight and obese people is increasing globally, leading to a steady rise in the prevalence of obesity related diseases such as type 2 diabetes mellitus (T2DM), non-alcoholic fatty liver disease (NAFLD), hypertension, hyperlipidemia, obstructive sleep apnea hypopnea syndrome (OSAS), and polycystic ovary syndrome (PCOS). However, significant and sustained weight loss is often not achieved with improved diet and increased physical activity. Evidence showed that bariatric surgery can provide significant and sustained weight loss and effective relief of T2DM and obesity related diseases. The underlying mechanisms may be related to gastrointestinal hormones, intestinal flora, circulating bile acids, systemic inflammation, brain-gut axis, immunity, and others. Even though Sleeve Gastrectomy (SG) and Roux-en-Y Gastric Bypass (RYGB) have become the most dominant surgical procedures in the world, postoperative complications and postoperative recurrences still exist. We still encourage new surgical options or techniques to evaluate their effectiveness and safety. We also hope to obtain more studies on bariatric surgery for obesity related diseases to provide clinical support and reveal the underlying mechanisms.

**The Shoulder** *Edward V. Craig, 2004* This highly acclaimed volume of the Master Techniques in Orthopaedic Surgery series is now in its Second Edition, greatly expanded and completely revised to reflect the latest improvements in surgical technique. The world's foremost shoulder surgeons describe their preferred techniques in step-by-step detail, explain the indications and contraindications, identify pitfalls and potential complications, and offer pearls and tips for improving results. The book is thoroughly illustrated with full color sequential surgeon's eye view intraoperative photographs as well as drawings by noted medical illustrators. The Second Edition provides thorough updates on all surgical techniques and highlights recent advances in arthroscopic treatment of the shoulder. New chapters cover latissimus dorsi transfers in rotator cuff reconstructions, surgical treatment of sternoclavicular injuries, revision surgery in total shoulder replacement, managing soft tissue deficiencies in total shoulder replacement, arthroscopic repair of rotator cuff, arthroscopic thermal stabilization, arthroscopic capsular release for the stiff shoulder, arthroscopic calcium excision, and open and arthroscopic debridement of full thickness rotator cuff tears. This edition includes many new contributing authors and new illustrations.
