In this ground breaking book the first to provide an overview of the theory and practice of experimental architecture, Rachel Armstrong explores how interdisciplinary design led research practices are beginning to redefine the possibilities of architecture as a profession. Drawing on experts from disciplines as varied as information technology, mathematics, poetry, graphic design, scenography, bacteriology, marine applied science and robotics, Professor Armstrong delineates original cutting edge architectural experiments through essays, quotes, poetry, equations and stories. Written by an acknowledged pioneer of architectural experiment, this visionary book is ideal for students and researchers wishing to engage in experimental practice based architectural and artistic research. It introduces radical new ideas about architecture and provides ideas and inspiration which students and researchers can apply in their own work and proposals while practitioners can draw on it to transform their creative assumptions and develop thereby a distinctive edge to stand out in a highly competitive profession.

Writing(s) at the Crossroads Georgeta Cislaru, 2015-08-05. This volume aims at contributing to an interpretive approach to writing and its dynamics. It offers a general scope on the process-product interface by multiplying the points of view on both the process and the product and their links. The book presents new findings and perspectives in the study of language and writing, both theoretical and methodological, e.g. dual process models of writing, pragmatics of writing, linguistic analysis of psycholinguistic units such as bursts of production. It also presents new tools for a longitudinal approach to the writing steps, key stroke logging with integrated linguistic modules and textometric analysis of written texts. The volume is composed of five sections that highlight different approaches to writing from the viewpoint of multiple disciplines: Anthropology, Cognitive Psycholinguistics, Communication Studies, Didactics, Applied Linguistics, Discourse Analysis, Literacy, Sociolinguistics and Text Genetics. This book will be relevant for scholars and students interested in writing, text analysis, literacy, learning and teaching. As of January 2019, this e-book is freely available thanks to the support of libraries working with Knowledge Unlatched.
