Ignorance and Surprise Matthias Gross, 2010-05-07 The relationship between ignorance and surprise and a conceptual framework for dealing with the unexpected as seen in ecological design projects Ignorance and surprise belong together surprises can make people aware of their own ignorance And yet perhaps paradoxically a surprising event in scientific research one that defies prediction or risk assessment is often a window to new and unexpected knowledge In this book Matthias Gross examines the relationship between ignorance and surprise proposing a conceptual framework for handling the unexpected and offering case studies of ecological design that demonstrate the advantages of allowing for surprises and including ignorance in the design and negotiation processes Gross draws on classical and contemporary sociological accounts of ignorance and surprise in science and ecology and integrates these with the idea of experiment in society He develops a notion of how unexpected occurrences can be incorporated into a model of scientific and technological development that includes the experimental handling of surprises Gross discusses different projects in ecological design including Chicago s restoration of the shoreline of Lake Michigan and Germany s revitalization of brownfields near Leipzig These cases show how ignorance and surprise can successfully play out in ecological design projects and how the acknowledgment of the unknown can become a part of decision making The appropriation of surprises can lead to robust design strategies Ecological design Gross argues is neither a linear process of master planning nor a process of trial and error but a carefully coordinated process of dealing with unexpected turns by means of experimental practice

The growing and diversifying of a civil sector is evident in Western states As a value in itself it can be interpreted as an
important prerequisite for modern societies to optimise the more and more complex task of problem solving But the question
arises if the definition and outlook of civil society is challenged as vision as well as reality in non Western states confronted
with different problems and possessing different structural and cultural historical roots Therefore the central issue of the
book is the development the importance and the functioning of the civil sector in the post socialist countries of Eastern
Europe The second directly connected issue is the question about the character of the post socialist transformations and the
diversity of development paths The last issue is the question about the role of regions the struggle between decentralising
and centralising forces and the problem of the social identity in new states This book aims to illustrate the diversity of
