Cunningham, Mary Ann Cunningham, Barbara Woodworth Saigo, 2003-03 This book is intended for use in a one or two semester course in environmental science human ecology or environmental studies at the college or advanced placement high school level Because most students who will use this book are freshman or sophomore nonscience majors the authors have tried to make the text readable and accessible without technical jargon or a presumption of prior science background At the same time enough data and depth are presented to make this book suitable for many upper division classes and a valuable resource for students who will keep it in their personal libraries after their formal studies are completed The goal of this book is to provide an up to date introductory view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles *Environmental Science: A Global Concern* William Cunningham, Mary Ann Cunningham, 2009-09-18 Environmental Science A Global Concern Eleventh Edition is a comprehensive presentation of environmental science for non science majors which emphasizes critical thinking environmental responsibility and global awareness This book is intended for use in a one or two semester course in environmental science human ecology or environmental studies at the college or advanced placement high school level We

have updated data throughout the chapters in this book. Information and examples presented are the most recent available as of the mid 2009. You will find an abundance of specific numbers and current events details that are difficult to keep up to date in a textbook. The goal of this book is to provide an up to date introductory global view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles. Because most students who will use this book are freshman or sophomore non science majors the authors make the text readable and accessible without technical jargon or a presumption of prior science background.

Transforming Teaching

With Generative AI Nick Gaspar, This guide provides educators with practical tools for integrating artificial intelligence into their K-12 and higher education classrooms. This user friendly book breaks down technical concepts to make AI understandable for educators without a background in technology. It builds from trusted frameworks and connects AI to the methods and expertise educators already bring to their teaching. Key topics include the basics of generative AI, prompt design, classroom integration, ethical concerns, assessment design, and academic integrity. Rather than treating AI as a challenge to work around, this guide encourages educators to see it as a way to accelerate learning and support students more effectively. With examples, case studies, strategies, and activities drawn from real teaching contexts, readers will learn how to set clear expectations for AI use and build classroom cultures where students engage with AI in thoughtful and practical ways.

Transforming Teaching With Generative AI offers teachers, teacher educators, instructional designers, and academic leaders a clear framework for using AI with purpose and on their own terms. Book Features: Offers a real world approach to using AI in education, including how to think critically about ethical challenges while staying focused on student learning. Uses clear explanations of complex topics from large language models to writing successful AI prompts. Provides guidance for using AI to craft assignments, assessments, and personalize student learning. Aligns new tools with existing teaching goals and values, including connecting AI integration to trusted models like TPACK and TILT. Includes user friendly features for busy educators, such as sample prompts, checklists, and discussion questions that support reflection and ease of implementation.
