Gayle Evans

Environmental Science Released Exam 2003:

AP Environmental Science Crash Course Gayle Evans, 2011-10-01 REA's AP Environmental Science Crash Course is the first book of its kind for the last minute student or any AP student who wants a quick refresher on the course. Written by an AP Environmental Science teacher, the targeted review chapters prepare students for the test by only focusing on the important topics tested on the AP Environmental Science exam. The easy-to-read review chapters in outline format cover everything AP students need to know for the exam: human population dynamics, managing public lands, energy conservation, changes in Earth's climate, species extinction, loss of biodiversity, and more. The author also includes must-know key terms all AP students should know before test day. With our Crash Course, students can study the subject faster, learn the crucial material, and boost their AP score all in less time. The author provides key strategies for answering the multiple choice questions so students can build their point scores and get a 5.

Accountability in education: meeting our commitments UNESCO, 2017-10-30. The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs. Faced with these challenges along with tight budgets and increased emphasis on results-oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017/8 GEM Report shows the entire array of approaches to accountability in education. It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive, equitable, and high-quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors—schools, teachers, parents, students, international organizations, private sector providers, civil society, and the media—have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not.

Back cover **Polar Lakes and Rivers** Warwick F. Vincent, Johanna Laybourn-Parry, 2008-09-11. This book provides an overview of the ecology of high-latitude lakes, rivers, and glacial environments in both the North and South polar regions.
