Constructing a Columnar Section from a Geologic Cross Section

Figure 2.12 is a schematic geologic cross section based on the mapping of different outcrops from several localities in a geographic area covering about 10 square miles. Formations shown by the same color and symbols are the same age. Study the cross section and complete the work called for in questions 1 and 2.

1. Construct a columnar section from this cross section using the numbered lines at the right of Figure 2.12 to record your interpretation. Indicate the name of a rock formation (e.g., shale, granite, alluvium) or an unconformity in its appropriate position in the section as determined from the

adjacent geologic cross sections. Igneous rock masses of the same age should be located on the same line. Remember that the oldest rock is located at the bottom.

2. Recount Figure 2.12. In this simplified geologic cross section, no evidence of metamorphic activity has been shown. Recall the earlier discussion of types of metamorphism, metamorphic grade, and the classification of metamorphic rocks. Had metamorphic rocks been included, indicate what types you would expect to find, and why (see pages 45–46).

Physical Geology 101 Laboratory Manual Anderson Ohan, Steven Okulewicz, Peter Rigotti, 2006-03 **Physical Geology Lab Manual**, 2015 Subject Guide to Books in Print, 1991 Geology From Experience E. Kirsten Peters, Larry E.

Davis, 2000-11-05 Moving away from the observation and vocabulary focus of traditional physical geology lab manuals Peters and Davis's *Geology from Experience* offers experiments that favor hands on involvement and scientific problem solving. Students are asked to use geological tools and techniques to analyze data from observation, experiment and research, solve simple equations and make assessments and relevant predictions. This approach, class tested with great success by the authors, gives students a real taste of the scientific experience by revealing the ways geologists actually do their work.

Geology 101: Dynamic Earth Lab: Physical Geology Lab Exercises Pearson Prentice Hall, 2006-01-01 *Physical Geology* Jeffrey R. Knott, Wayne Henderson, Kristin Weaver Bowman, Patricia Butcher, 2016-08-02 This book is intended for an introductory geology class for non-science majors. The seven chapters on minerals, rocks, geologic history, earthquakes, and geologic hazard maps in this textbook provide the fundamentals of a 15-week introductory geology laboratory course. The homework chapters on plate tectonics, the rock cycle, and topographic maps may be used as review or introduction to digitally delivered lab assignments on these topics. Optimally, this manual is used in conjunction with digitally delivered assignments and local field trips. For the instructor, this textbook provides the common topics that are covered in an introductory geology lab class. This provides the introductory framework after which the instructor includes local elements into the curriculum. Many of the labs have a clear answer sheet that makes turning in assignments easy, as well as a short directed, easily graded writing assignment. Students benefit from not having to purchase a full 15-20 chapter manual from which only 10-15 chapters are used. The pre-lab reading is directed at the information required to complete the lab tasks, which means that the manual is independent of any additional general lecture class. *Laboratory Manual for Physical Geology* James Herbert Zumberge, Robert Hoxie Rutherford, 1983 This laboratory manual is written for the freshman level laboratory course in physical geology. In this lab, students study Earth materials, geologic interpretation of topographic maps, aerial photographs, and Earth satellite imagery, structural geology, and plate tectonics, and related phenomena. With nearly 30 exercises, professors have great flexibility when developing the syllabus for their physical geology lab course. The ease of use, tremendous selection, and tried and true nature of the labs selected have made this lab manual one of the leading selling physical geology lab manuals.
