Challenges of Conflicting School Reforms Mark Berends,JoAn Chun,Gina Schuyler Ikemoto,Sue Stockly,R. J. Briggs,2002-03-29 A decade ago New American Schools NAS launched an ambitious effort forwhole school reform to address the perceived lagging achievement of Americanstudents and the lackluster school reform attempts that have produced so fewmeaningful changes As a private nonprofit organization NAS set out tohelp schools and districts significantly raise the achievement of largenumbers of students by offering whole school designs and design basedassistance during the implementation process NAS is currently in the scale up phase of its effort and its designs are being widely diffused toschools across the nation During the 1997_1998 and 1998_1999 school years RAND assessed the effects of NAS designs on

classroom practice and student achievement in a sample of schools in a high poverty district RAND found that high poverty schools often have fragmented and conflicting environments with difficult and changing political currents and entrenched unions Teachers in high poverty schools tend to face new accountability systems and fluctuating reform agendas These teachers generally lack sufficient time for implementing reform efforts often becoming demoralized and losing their enthusiasm for the difficult task of improving student performance under difficult conditions RAND concluded that high stakes tests may motivate schools to increase performance and to seek out new curricula and instructional strategies associated with comprehensive school reforms However those same tests may provide disincentives to adopt richer more in depth curricula that can succeed in improving the learning opportunities of all students particularly those in high poverty settings
