

RESEARCH PROPOSAL TEMPLATE

When preparing an application for entry into a research higher degree program it is necessary to supply a clear statement describing the proposed area of research (a research proposal). Consultation with a faculty or school academic staff member in the research area of interest is recommended prior to submission of an application. Liaising with an academic allows you to frame the proposal to align with established disciplines and areas of supervisor capacity.

You must write your own research proposal and reference accordingly. The exception is when your potential supervisor finalises the research proposal with you, for a specific research project that has already been defined. Please visit the University's Academic Integrity pages and policy

General

- Length: From one to three pages is often suitable, depending on the area of research.
- Detail: The following outline may be used as a guide. You should consider each of the areas that will be relevant to your research.
- Minimum: The recommended minimum requirements are identified with an asterisk (*).

Research topic/title*

An initial working title should be provided and should describe the content and direction of your project. For example: *A template for assisting research students in the development of a research proposal.*

PROJECT DESCRIPTION

Background

What is already known or unknown? Set the scene.

Aims*

What do you want to know, prove, demonstrate, analyse, test, investigate or examine? List your project aims in a logical sequence. For example: The aim of this project is to:

- Provide an outline of a research proposal
- Enable a prospective student to prepare a research proposal

Methodology*

How do you anticipate you will achieve these aims?
What do you need? (specify any special equipment, software or material) Can you access necessary data or expertise?
Do you require particular resources?
Are there barriers or pitfalls?
Does the project involve human ethics, animal ethics or safety implications?
Is travel or fieldwork required? If so, where to, how long and at what intervals?

Expected outcomes, significance or rationale

Why is it important?
What do you expect it will deliver?
What are the expected outcomes?
Establish the importance of your project by highlighting its originality or why it is worth pursuing. Highlight the benefits, positive expected outcomes or innovative applications of knowledge.

Timetable*

Indicate the timeframe for each broad stage considering literature surveys, data collection, production, modelling, review, analysis, testing, reporting, chapter and thesis writing, and thesis submission date.

Lester (Jr.), 2007 The Principles of Writing Research Papers is the ultimate brief research reference Pocket sized and inexpensive this research guide is priced to work as a supplement in any research oriented course Designed as a guide for writing research papers both in first year composition courses and in upper level courses in all disciplines The Principles of Writing Research Papers is rooted in the fundamentals of thorough library research but encourages and equips students to use the Internet as well as field research where appropriate It endorses the written word while recognizing the

value of graphics audio video and slide presentations It includes numerous student samples and excerpts of model research papers with particular attention to MLA documentation style **How to Prepare a Research Proposal** David R.

Krathwohl,1988 The public assumes the researcher spends the day dreaming up and trying out creative ideas In reality proposal development is an invisible but critical barrier over which even a good researcher may tumble This book is intended to lower that barrier It should increase first trial recognition of good ideas and ensure that rejections do not result because a proposal poorly represented either the ideas the investigator or both **Developing Effective Research Proposals** Keith

Punch,2000-05-15 This accessible how to guide can be used as a workbook to the author s *An Introduction to Social Research* or as an independent guide It is a guide to preparing a well constructed research proposal then presenting it effectively

Growing Up John R. Morss,Tim Linzey,1991 The study of human development in New Zealand as elsewhere was long dominated by the theories of the Swiss psychologist Jean Piaget In recent years however Piaget s ideas have been increasingly challenged and even discredited Piaget it was discovered was unable to recognise the significance of social cultural or gender differences in development His only way of portraying development was as a universal sequence of stages Moreover Piaget s account of developmental change stopped at adolescence What are the implications of the eclipse of Piaget How do we study human development here and now after Piaget *Growing up* tackles these questions head on It does so in an accessible manner and in a New Zealand context Having summarised the reasons for Piaget s decline the contributors explore alternatives In particular they discuss Vygotsky and Bronfenbrenner which attempt to take account of the social cultural and historical contexts of individual development The emphasis throughout is on the need for explanation to be localised and specific Therefore special attention is paid to the New Zealand context and to issues of gender of race and of disability The role of research is also given critical attention since research in general has made the same assumptions of universality of which Piaget is now accused *Growing up* therefore introduces readers to a wide range of research methods and shows that the traditional psychology based methods are problematic Back cover
