prepared this textbook in Hindi to bring out the mystery of CNC programming. It has been put in a logical order and written in a very simple language which everyone can understand very easily. To create a program the step by step process has been explained in this book with useful examples which will greatly benefit the students associated with this field. In this book I have used the method created by me to write the program in which I have described each G and M code in detail. In this book Coordinate systems have been explained in detail in simple language. For this space has been left to practice all the coordinate systems. This will help in understanding this chapter easily. In this most of the machining centers functions of machines working method of the machine and the main parts of the machine control panel buttons related to the operator panel have been described in detail. Simple method of making programs has been explained with examples. An attempt has been made to cover most of the machining processes in this. Different types of materials and detailed pictures have been included to help in understanding it. My feeling is that anyone who wants to make their future in CNC programming will benefit from this book and they will emerge as a successful CNC programmer. Many readers who may need some other different kind of programmer will benefit from these references with additional information.
