**Taking Back Philosophy** Bryan W. Van Norden, 2017-12-05 Are American colleges and universities failing their students by refusing to teach the philosophical traditions of China India Africa and other non Western cultures? This biting and provocative critique of American higher education says yes. Even though we live in an increasingly multicultural world most philosophy departments stubbornly insist that only Western philosophy is real philosophy and denigrate everything outside the European canon. In *Taking Back Philosophy* Bryan W. Van Norden lambastes academic philosophy for its Eurocentrism insularity and complicity with nationalism and issues a ringing call to make our educational institutions live up to their cosmopolitan ideals. In a cheeky agenda setting and controversial style Van Norden an expert in Chinese philosophy proposes an inclusive multicultural approach to philosophical inquiry. He showcases several accessible examples of how Western and Asian thinkers can be brought into productive dialogue demonstrating that philosophy only becomes deeper as it becomes increasingly diverse and pluralistic. *Taking Back Philosophy* is at once a manifesto for multicultural education an accessible introduction to Confucian and Buddhist philosophy a critique of the ethnocentrism and anti intellectualism characteristic of much contemporary American politics a defense of the value of philosophy and a liberal arts education and a call to return to the search for the good life that defined philosophy for Confucius Socrates and the Buddha. Building on a popular New York Times opinion piece that suggested any philosophy department that fails to teach

non Western philosophy should be renamed a Department of European and American Philosophy this book will challenge any student or scholar of philosophy to reconsider what constitutes the love of wisdom **Arts-Based Educational Research and Qualitative Inquiry** Thalia M. Mulvihill, Raji Swaminathan, 2019-11-04 Awarded QRSIG's Honorable Mention for 2021 2020 AESA Critics Choice Book Award Winner Arts Based Educational Research and Qualitative Inquiry introduces novice qualitative researchers within education and related fields to arts based educational research ABER Abundant prompts and exercises are provided to help readers apply the concepts and experiment with various applications of the ideas presented The authors walk the path with novice researchers offering a variety of approaches to the practice of arts based methods while providing a guided overview of ABER and include pedagogical features in each chapter Exercises are designed to assist educational researchers who wish to expand their repertoire of methodologies The authors also weave into the discussion the possibilities and limitations of many types of arts based methods while introducing readers to the growing methodological literature By offering a tapestry of ways to engage the novice researcher the book illustrates that it is not always possible to separate cognitive findings from aesthetic knowing This book will help qualitative researchers to expand their methodologies to include arts based approaches to their projects and by doing so reshape their identities as qualitative researchers It also offers some evaluative criteria and tool kits for experimenting with various arts and educational research

Inclusive Education at the Crossroads explores the short and long term effectiveness of government plans to reform policy for special needs education confronting difficult questions on policies about inclusion and suggesting alternative ways forward for achieving more effective education of children with special educational needs and disabilities SEND Inclusion has been a central concern for education systems globally for over three decades However has preoccupation with inclusion been at the expense of effective education for children with SEND Where do policies for inclusion lead and do they amount to the special education reform that is needed What do the worldwide experiences of inclusion and special education reveal about how to improve the quality of education systems for all children in the future How effective is provision for children with SEND today Through this informative and topical book Gordon Gould and Hornby shine an interrogating spotlight on current provision for SEND and ask if current legislation and policy inadvertently reinforce problems if they cause many children with SEND to fall short of their potential as well as preventing many schools from improving their levels of overall academic attainment Inclusive Education at the Crossroads provides theory and research for teachers school leaders governors policy makers researchers parents post graduate students and anyone seeking practical solutions to meeting the needs of pupils with SEND in any global context It will encourage open debate about the essence of educational inclusion in order to stimulate creative thinking among all stakeholders

**Born to Choose** John H Falk,2017-09-05

Born to Choose is John H Falk s compelling account of why and how we make the endless set of choices we do every second of every day of our lives Synthesizing research from across the biological and social sciences Falk argues that human choice making is an evolutionarily ancient and complex process He suggests that all our choices are influenced by very basic and early evolving needs and that ultimately each choice is designed to support survival in the guise of perceived well being This engaging book breaks new intellectual ground and enhances our understanding not just of human choice making but human behavior overall

Charged Particles in Oncology Marco Durante,Francis A. Cucinotta,Jay S. Loeffler,2018-01-31 High energy charged particles represent a cutting edge technique in radiation oncology Protons and carbon ions are used in several centers all over the world for the treatment of different solid tumors Typical indications are ocular malignancies tumors of the base of the skull hepatocellular carcinomas and various sarcomas The physical characteristics of the charged particles Bragg peak

allow sparing of much more normal tissues than it is possible using conventional X rays and for this reason all pediatric tumors are considered eligible for protontherapy Ions heavier than protons also display special radiobiological characteristics which make them effective against radioresistant and hypoxic tumors On the other hand protons and ions with high charge Z and energy HZE particles represent a major risk for human space exploration The main late effect of radiation exposure is cancer induction and at the moment the dose limits for astronauts are based on cancer mortality risk The Mars Science Laboratory MSL measured the dose on the route to Mars and on the planet's surface suggesting that a human exploration missions will exceed the radiation risk limits Notwithstanding many studies on carcinogenesis induced by protons and heavy ions the risk uncertainty remains very high In this research topic we aim at gathering the experiences and opinions of scientists dealing with high energy charged particles either for cancer treatment or for space radiation protection Clinical results with protons and heavy ions as well as research in medical physics and pre clinical radiobiology are reported In addition ground based and spaceflight studies on the effects of space radiation are included in this book Particularly relevant for space studies are the clinical results on normal tissue complications and second cancers The eBook nicely demonstrates that particle therapy in oncology and protection of astronauts from space radiation share many common topics and can learn from each other
