Routledge Handbook of Global Health Security Simon Rushton, Jeremy Youde, 2014-08-07
This new Handbook presents an overview of cutting-edge research in the growing field of global health security. Over the past decade, the study of global health and its interconnection with security has become a prominent and rapidly growing field of research. Ongoing debates question whether health and security should be linked, which if any health issues should be treated as security threats, what should be done to address health security threats, and the positive and negative consequences of securitizing health. In academic and policy terms, the health security field is a timely and dynamic one, and this handbook will be the first work comprehensively to address this agenda. Bringing together the leading experts and commentators on health security issues from across the world, the volume comprises original and cutting-edge essays addressing the key issues in the field and also highlighting currently neglected avenues for future research. The book intends to provide an accessible yet sophisticated introduction to the key topics and debates and is organized into four key parts: Health, Security, the fundamental conceptual issues, historical links between health and security, and the various ways of conceptualising health as a security issue; Threats, those health issues which have been most frequently discussed in security terms; Responses, the wide range of contemporary security-driven responses to health threats; Controversies, the securitization of health, its impact on rights and justice, and the potential distortion of the global health agenda. This book will be of great interest to students of global health, security, public health, critical security studies, and International Relations in general. [Rural America in a Globalizing World](#) Conner Bailey, Leif Jensen, Elizabeth Ransom, 2014. This fourth Rural Sociological Society decennial volume provides advanced policy scholarship on rural North America during the 2010s, closely reflecting upon the increasingly global nature of social, cultural, and economic forces and the impact of neoliberal ideology upon policy, politics, and power in rural areas. The chapters in this volume represent the expertise of an influential group of scholars in rural sociology and related social sciences. Its five sections address the changing structure of North American agriculture, natural resources, and the environment, demographics, diversity, and quality of life in rural communities. **Space Life Sciences** M.
