## **Life Science Paper Kzn Prelim 2014:**

**Curriculum and the Specialization of Knowledge** Michael Young, Johan Muller, 2015-09-07 This book presents a new way for educators at all levels from early years to university to think about curriculum priorities. It focuses on the curriculum as a form of specialised knowledge optimally designed to enable students to gain access to the best knowledge available in any field. Papers jointly written by the authors over the last eight years are revised for this volume. It draws on the sociology of knowledge and in particular the work of Emile Durkheim and Basil Bernstein opening up the possibilities for collaborative inter disciplinary enquiry with historians, philosophers and psychologists. Although primarily directed to researchers, university teachers and graduate students, its arguments about specialised knowledge have profound implications for policy makers.

*Evolution Education Around the Globe* Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross cultural meta analysis. Written for a primarily academic audience, this book provides a much needed common background for future evolution education research across the globe.

*Preventing HIV Among Young People in Southern and Eastern Africa* Kaymarlin Govender, Nana K Poku, 2020-12-30 This book provides an overview of the current epidemiology of the HIV epidemic among young people in Eastern and Southern Africa (ESA) and examines the efforts to confront and reduce the high level of new HIV infections amongst young people. Taking a multi dimensional approach to prevention, the contributors discuss the many challenges facing these efforts in view of the slow progress in curbing the incidence of HIV amongst young people, focusing particularly on the structural and social drivers of HIV. Through an examination of these issues, chapters in this book provide valuable insights on how to mitigate HIV risk among young people and what can be regarded as the catalysts to mounting credible policy and programmatic responses required to achieve epidemic control in the region. The contributors draw on examples from a range of primary and secondary data sources to illustrate promising practices and challenges in HIV prevention, demonstrating links between conceptual approaches to prevention and lessons learnt from implementation projects in the region. Bringing together social scientists and public health experts who are actively engaged in finding effective solutions, the book discusses which interventions work, why they work, and the limitations and gaps in our knowledge to curb the

pandemic amongst young people As such it is an important read for researchers focusing on HIV AIDS and public health The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/10.4324/9780429462818> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Tribing and Untribing the Archive** Carolyn Hamilton, Nessa Leibhammer, 2016 These volumes track how the domain of the tribal and traditional was marked out and came to be sharply distinguished from modernity how it was denied a changing history and an archive and was endowed instead with a timeless culture These volumes also offer strategies for engaging with the materials differently from the interventions effected in contemporary artworks to the inserting of nameless timeless objects of material culture into histories of individualized and politicized experience Publisher's description
