

UNIT ONE

THE SCIENCE OF GEOGRAPHY

1.1 The meaning of Geography

Science is defined as a body of knowledge that is systematized, organized, experimented and verified. And Geography has almost all these characteristics. Hence, it is a science.

Ancient Greeks defined geography for the first time by combining two words "geo" and "graphic"

- Geo means earth and
- Graphic means writing.

Therefore, Geography is description of the earth. But, this definition seems general compared to the current scope of geography.

Note: the first person to define geography was Eratosthenes.

Geography has no single universally accepted definition. The commonly accepted one is " *the study of the spatial distribution of both physical and human made things and phenomena on the earth's surface and two way interactions and interdependences between natural and human environments.*"

All definitions of geography emphasize that geography is a spatial science. In its modern context, spatial perspective is concerned with "where" and "why there" questions.

There are 5 pertinent questions about the phenomena they study. There are:

1. Where are things located?

2. Why are they located where they are?

Insights into Disciplinary Literacies Ainara Imaz Agirre,Roberto Arias-Hermoso,2025-11-28

Offers fresh perspectives on academic and disciplinary literacies across a range of contexts This book presents empirical evidence of the academic and disciplinary literacies that learners engage with in educational contexts The chapters focus on the languages of schooling in first second or foreign language contexts across primary secondary and higher education The book is divided into two main sections The first section focuses on students voices and perceptions providing new insights into the difficulties they encounter when developing academic or disciplinary literacies in different contexts and disciplines The second section addresses students academic or disciplinary literacy skills both productive and receptive The chapters

include qualitative quantitative and mixed method studies and provide valuable new insights across a range of educational contexts *Handbook of Research on International Approaches and Practices for Gamifying Mathematics* Huertas-Abril, Cristina A., Fernández-Ahumada, Elvira, Adamuz-Povedano, Natividad, 2022-05-13 Game based resources provide opportunities to consolidate and develop a greater knowledge and understanding of both mathematical concepts and numeracy skills which present opportunities and challenges for both teachers and learners when engaging with subject content. For learners for whom the language of instruction is not their first or main language this can present challenges and barriers to their progress. This requires teachers to reconsider and adapt their teaching strategies to ensure the needs of these learners are fully addressed thereby promoting inclusion and inclusive practices. The *Handbook of Research on International Approaches and Practices for Gamifying Mathematics* provides relevant theoretical frameworks and the latest empirical research findings in teaching and learning mathematics in bilingual plurilingual education by using active methodologies specifically gamification and game based learning and teaching. Covering a wide range of topics such as e safety, bilingual education and multimodal mathematics this major reference work is ideal for policymakers, researchers, academicians, practitioners, scholars, instructors and students.

Influences of the IEA Civic and Citizenship Education Studies Barbara Malak-Minkiewicz, Judith Torney-Purta, 2021-05-26 This open access book identifies the multiple ways that IEA's studies of civic and citizenship education have contributed to national and international educational discourse, research, policymaking and practice. The IEA International Civic and Citizenship Education Study (ICCS) first conducted in 2009 was followed by a second cycle in 2016. The project was linked to the earlier IEA Civic Education Study (CIVED 1999/2000). IEA's ICCS remains the only large scale international study dedicated to formal and informal civic and citizenship education in school. It continues to make substantial contributions to understanding the nature of the acquired civic knowledge, attitudes and participatory skills. It also discusses in depth how a wide range of countries prepare their young people for citizenship in changing political, social and economic circumstances. The next cycle of ICCS is planned for 2022. In this book, more than 20 national representatives and international scholars from Europe, Latin America, Asia and North America assess how the processes and findings of the 2009 and 2016 cycles of ICCS and CIVED 1999/2000 have been used to improve nations' understanding of their students' civic knowledge, beliefs, attitudes, current civic related behaviors and intentions for future participation in a comparative context. There are also chapters summarizing the secondary analysis of those studies' results, indicating their usefulness for educational improvement and reflecting on policy issues. The analyses and reflections in this book provide timely insight into international educational discourse, policy, practice and research in an area of education that is becoming increasingly important for many societies.
