Smith-Ruiz, Sherri Lawson Clark, Marcia Watson, 2016-10-04 For decades the black community has been perceived both in the United States and around the world as one which thinks alike acts alike and lives alike in poor and downtrodden environments. Following the persistent effects of the great recession and the American elections of 2008 now more than ever the political and socio economic state of America is crying out for this deficient and prejudiced conception to be dispelled. Focusing primarily on black families in America Contemporary African American Families updates empirical research by addressing various aspects including family formation, schooling, health and parenting. Exploring a wide class spectrum among African American families this text also modernizes and subverts much of the research resulting from Moynihan's 1965 report which arguably misunderstood the lived experiences of black people during the movement from slavery to freedom in a Jim Crow society. A timely subversion of the myth that America is successfully in a post racial era this new anthology on the Black Family in America will appeal to advanced undergraduate students and research scholars interested in black studies, Africana studies, women and gender studies, sociology, political science, anthropology, criminal justice, education, psychology, public policy, healthy policy and social work.

**Rare Earth Frontiers** Julie M. Klinger, 2018-01-15  
Rare Earth Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics, green energy and medical technologies and essential telecommunications and defense systems. Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global. Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places. Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths. She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power. These include legally and logically forbidding locations in the Amazon, Greenland and Afghanistan and on the Moon. Drawing on ethnographic, archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place, a concept and a zone of contestation, sacrifice and transformation.
