Urban Subversion and the Creative City Oli Mould,2015-03-27 Check out the author s video to find out more about the book <https://vimeo.com/124247409> This book provides a comprehensive critique of the current Creative City paradigm with a capital C and argues for a creative city with a small c via a theoretical exploration of urban subversion The book argues that the Creative City with a capital C is a systemic requirement of neoliberal capitalist urban development and part of the wider policy framework of creativity that includes the creative industries and the creative class and also has inequalities and injustices in built The book argues that the Creative City does stimulate creativity but through a reaction to it not as part of it Creative City policies speak of having mechanisms to stimulate individual collective or civic creativity yet

through a theoretical exploration of urban subversion the book argues that to be truly creative is to be radically different from those creative practices that the Creative City caters for Moreover the book analyses the role that urban subversion and subcultures have in the contemporary city in challenging the dominant political economic hegemony of urban creativity Creative activities of people from cities all over the world are discussed and critically analysed to highlight how urban creativity has become co opted for political and economic goals but through a radical reconceptualisation of what creativity is that includes urban subversion we can begin to realise a creative city with a small c **Global Migration** Elizabeth Mavroudi,Caroline Nagel,2016-06-03 This new fully updated edition of Global Migration provides students with a thorough and grounded understanding of multiple dimensions of migration including labour markets citizenship border control integration and identity Written by two geographers the book incorporates insights from across the social sciences and is accessible to students in many disciplines Providing a useful and timely introduction to migration the textbook addresses migration in a holistic way and equips students with the tools they need to participate in contemporary debates about migration in sending and destination contexts It conveys to students that the causes and effects of migration are geographically specific and contingent upon class race gender and other markers of social difference Rather than identifying simple solutions to migration problems the book encourages students to think about unauthorized migration asylum refugee resettlement labour migration and other forms of mobility and immobility from different vantage points Global Migration serves as the go to book for teaching advanced undergraduate and Master s level students about the complexities of migration across nation state borders **Infinite Suburbia** MIT Norman B. recruitment we seem doomed to a worsening struggle with a constantly evolving enemy that remains several steps ahead of us. Unfortunately current policies seem almost guaranteed not to reduce extremist violence but instead to make it easier for terrorists to spread their hateful ideas, recruit new members and carry out attacks. We actually possess the means right now to inoculate communities against extremist ideologies. In *How We Win* Farah Pandith presents a revolutionary new analysis of global extremism as well as powerful but seldom used strategies for vanquishing it. Drawing on her visits to eighty countries, the hundreds of interviews and focus groups she's conducted around the world and her high level experience in the Bush and Obama administrations, Pandith argues for a paradigm shift in our approach to combat extremism, one that mobilizes the expertise and resources of diplomats, corporate leaders, mental health experts, social scientists, entrepreneurs, local communities and most of all global youth themselves.
