## **Medical Library Association Guide To Health Literacy:**

*The Medical Library Association Guide to Health Literacy* Marge Kars, Lynda Baker, Feleta L. Wilson, 2008 Helps you understand the role that medical hospital public and health libraries are uniquely qualified to play in improving health literacy. This work teaches you ways to use collection development, the reference interview, community health information, and Web resources as well as strategies for working with special needs populations. **Health Literacy and Libraries** Emily Vardell, Deborah Charbonneau, 2024-02-27 Selected as a 2025 Doody's Core Title. This book brings together a diverse range of scholars and practitioners working at the nexus of health literacy work in libraries. This engaging resource presents a practical and accessible guide to meet the needs of librarians, health literacy researchers, and information and service professionals seeking to address health literacy needs in their communities. Through chapters offering multiple perspectives on the topic, the book covers specific types of literacy such as mental health literacy and health insurance literacy, as well as timely applications such as health misinformation. Chapters in this compilation also feature health literacy and the following communities: LGBTQ, Latinx, Black, and Immigrants, Refugees, and Migrants. The book is full of numerous examples, thoughtful advice, and discussions addressing the challenges of working with adolescents and young adults, older adults, and parent caregivers of children with rare diseases. Each chapter starts with Key Messages synthesizing the main points and concludes with a proposed set of Discussion Questions to inspire further reflection and to facilitate health literacy conversations. Overall, the up-to-date coverage of health literacy in various contexts explored throughout the book will be beneficial to a range of stakeholders interested in health literacy work.

**The Medical Library Association Guide to Providing Consumer and Patient Health Information** Michele Spatz, 2014-05-01 Comprised of fifteen chapters written by experienced consumer health librarians, *The Medical Library Association Guide to Providing Consumer and Patient Health Information* is designed for library and information science graduate students as well as librarians new to health and medical librarianship, regardless of library setting. It is comprehensive in scope, covering all aspects of consumer and patient health and medical information, from their humble grassroots beginnings to the ever-evolving applications of new technology and social media. In between the mundane aspects of health and medical librarianship, such as needs assessment, costs, budgeting, and funding, and staffing, are discussed. Adding richness to this discussion are the coverage of more sensitive topics such as patient-friendly technology, ethical issues in providing consumer and patient health information, meeting the needs of diverse populations, and responding to individuals from various cultural backgrounds. No comprehensive picture of consumer and patient health librarianship would be complete without addressing the critical importance of marketing and strategic partnerships; such discussions round out this invaluable guide. Patients today must be knowledgeable enough to participate in their health and well-being. Shorter hospital stays, changing reimbursement patterns, and the gradual shift towards focusing on proactively maintaining health and managing disease require patients to be informed and actively engaged. Education, information, and understanding

are important components of actively engaged patients Correspondingly in today's world there is a glut of information resources available through the Internet from YouTube videos to Googling to blogs and Twitter feeds What is lacking in these information rich times is the relevance of meaning and context for those who ask Does this health and medical information apply to me and my unique clinical picture or How do I use this information As knowledge navigators information technology wizards and content experts librarians offer focused responses to individuals specific and highly personal health and medical information queries In a new healthcare world order of optimizing health and minimizing hospitalizations such a service is invaluable Sadly there still exists in our highly networked and technological age an information gap for those who struggle in obtaining meaningful health or medical information These individuals may be foreign born non English speaking poor rural aged or semi literate Whatever their status librarians must have the wherewithal to find germane resources and also help create responsive mechanisms to bridge that health information gap for vulnerable citizens The Medical Library Association Guide to Providing Consumer and Patient Health Information will guide you on the road to providing that response *The Medical Library Association Guide to Providing Consumer and Patient Health Information* Michele Spatz, 2014-05-01
