---

Each year approximately 35,000 medical school applicants compete for 17,000 coveted spots (Jones and Baer 1). Competition is greater if you apply to the better or best schools. Top twenty medical schools, for example, accept about 7.5% of all applicants, while the Mayo Clinic and the Cornell University Weill Medical College accept as few as 3% (Jones and Baer 146). Writing a quality personal statement will help you get accepted to one of the medical schools of your choice. The guidelines below will help you achieve this goal.

## The Importance of the Personal Statement

The importance of the personal statement will vary from one institution to the next. Prestigious schools place a greater weight on the essays because they receive more applications and can be more selective. Certain medical programs, moreover, value the personal statement more than others; the Virginia College of Osteopathic Medicine, for example, considers the essays the second most important part of the application package after the science GPA (Staff of the Princeton Review 101). For applicants with borderline GPAs and test scores, the personal statement may be the deciding factors for the admissions committee. Though a strong academic profile may get you into most medical schools, the personal statement and secondary essays may help you get accepted to the school of your choice. Finally, as an admissions officer note, “the personal statement can have a huge impact on an admission decision, both positive and negative” (The Staff of the Princeton Review 97).

## Writing Your Personal Statement

Most how-to books and university Web pages include generic writing guidelines that apply to not only medical school personal statements but business and law schools essays as well. I want to reinforce the value of this general advice in following pages and also provide you with more specific suggestions, comments, and guidelines that will help you think of the medical school personal statement as a specific kind of essay, or genre, defined by a fairly specific set of values, beliefs, discourse practices, and epistemological assumptions.

This statement, I realize, may seem abstract, even impractical, to readers who think concretely and would prefer step-by-step guidelines to help them negotiate this unfamiliar, even daunting, writing task. As we all know, however, good writing results from good thinking, which begins with situating writing in a context—in this case, a professional community—and understanding the purpose of the writing task. Like all other applicants, you want to convince admissions officers and other readers that you will succeed in medical school and go on to be the kind of doctor that so many applicants idealize in their medical school personal statements.

To achieve this goal, you should read the following guidelines and sample essays and familiarize yourself with the features and conventions of the medical school personal statement.

It begins with an overview of the structure of a typical MD/PhD program as well as student outcomes and career choices of MD/PhD graduates. Next is an outline of the academic and extracurricular prerequisites as well as the basic components of the application itself. The authors then address the factors that MD/PhD students should consider when selecting schools to which to apply. Continuing to the main application, examples are provided of all the different essay types that MD/PhD applicants will encounter along with comments on how to address the deliberately vague and abstract prompts while tailoring the responses to the combined degree program. Most uniquely included is a very detailed explanation of the many types of interviews that applicants will encounter and how to prepare for them by integrating extensive personal experience and first-hand discussions with MD/PhD program leaders. Lastly, there will be a discussion on how to cope with the year-long timeline that constitutes this application process and provide guidance regarding properly responding to acceptances and waitlist offers. Written by a team of authors each experienced with the MD/PhD application, this book aids the prospective applicant with navigating this challenging process. **Tips for the Residency Match** Justin W.
