Medusa

User Guide

Introduction

The Injectable Medicines Guide (also known as Medusa) is a resource containing monographs which give information on medicines given by intravenous injection or infusion. The information is used nationally across the UK. There are also some monographs for the administration of intra-muscular and intra-ocular injection. In addition there are numerous useful documents which can be found on the 'Documents and Links' page of the website accessed from the home page.

Accessing the on-line monographs

The website can be accessed in 2 ways:

1. Via your desktop icon
2. Via ePmA

See flow chart on Page 2

Hard copies

All clinical areas also have hard copies of the Injectable Medicines Guide containing up to 100 monographs suitable to their area. There are however far more monographs available on the website and users should always check the website if the monograph is not in their ward file. The hard copies of the Guide are updated by Medicines Information every 3 months. However, be aware that printed copies of monographs may not be the most up-to-date.

Printed copies added to the folder **MUST** be placed in a plastic wallet to comply with infection control standards.

Paediatrics and Neonates

Although specific paediatric Injectable Medicines Guide monographs are now available, there will be a rolling programme during Autumn 2015 to switch over to the Injectable Medicine Guide monographs where possible. In the interim, the UHL Paediatric and Neonatal Monographs should continue to be used for these groups (accessed via ePmA—search for drug names).

Intramuscular and intra-ocular administration

The Injectable Medicines Guide also includes monographs relating to intramuscular and intra-ocular administration which can be accessed via the relevant tabs on the left hand side of the homepage.

Medusa Injectable Medicines Guide:

Practical Prescribing for Medical Students Helen Bradbury, Barry Strickland Hodge, 2013-11-08 Learning to prescribe is an essential part of medical training. Due to various high profile serious prescribing errors the GMC have introduced stricter prescribing standards which medical students must meet in order to graduate. This book helps medical students learn the essentials of safe prescribing practice and is aimed directly at their needs. It covers all the aspects of prescribing required by the GMC including principles of prescribing law and ethics, professional responsibilities, patient communication at risk groups, avoiding common errors and what to do when things go wrong. Key features: Directly linked to the prescribing competencies in the GMC's *Tomorrow's Doctors* and *Good Practice in Prescribing Medicines*. Real life prescribing case studies and scenarios relate the principles to actual practice and placement situations. Activities throughout each chapter for testing prescribing knowledge and skills. Test questions for the new Prescribing Skills Assessment to help students prepare and be confident that they can pass.

Understanding Medicines Management for Nursing Students Paul Deslandes, Ben Pitcher, Simon Young, 2025-03-07 Understanding medicines management is central to the nursing role. As a nurse you will need to make informed decisions about medicine use and optimisation that is tailored to each patient in your care. This book equips you with the theoretical and practical foundations to do just that. It covers the key components of medicines management for all fields using a scenario based approach to illustrate how each topic relates to your real life practice. Key features: Fully mapped to the NMC standards of proficiency for registered nurses 2018. Scenarios and activities help you to translate the theory into evidence based practice from injections and dosing to safety and ethics. Now with new discussions on medicines adherence, access to medicines, cultural competence and treating children. Acts as a stepping stone to support your readiness to undertake a prescribing qualification upon registration.

Student Success in the Prescribing Safety Assessment (PSA) Vilius Savickas, 2020-05-06 Student Success in the Prescribing Safety Assessment PSA. The Prescribing Safety Assessment PSA is a two hour open book online examination which comprises eight sections incorporating eight main types of questions. The questions are structured around clinical case based scenarios requiring a holistic approach to analysing information and identifying.
