## **Mei June 2013 Question Papers:**

**The Struggle for Influence in the Middle East** Federica Bicchi, Benoit Challand, Steven Heydermann, 2018-02-02 This collection of research papers explores the impact of the Arab uprisings on the politics and political economy of foreign aid provision in the MENA region. Contributions focus on the foreign assistance policies and strategies of key donors United States, Europe, Gulf countries and Turkey and on the relationship between donors and recipients of foreign aid in a select set of MENA cases: Tunisia, Egypt, Palestine and to a lesser extent Morocco. Despite widespread rhetoric among lead donors pledging to support the transformational potential of the Arab uprisings, the contributions find a more complex pattern in foreign aid provision since 2011. Among Arab donors who have played a significant role as providers of aid to states most affected by mass protests, trends in foreign assistance reflect the competing priorities of donors and their willingness to politicize aid provision in pursuit of their strategic interests. Among Western donors, authors find a high degree of continuity. Chapters that focus on Western donors seek to account for continuity on the part of Western governments and the EU at a moment of profound transformational potential. Two factors: bureaucratization and securitization capture most of the explanations provided, which take into account a variety of local dimensions as well. Contributions also discuss the changing assistance environment, namely the globalization of foreign assistance, the complex bureaucratic arrangements presiding over the delivery of European and US aid, and the role of regional and international non-democracies in the provision of foreign assistance. This book was published as a special issue of *Mediterranean Politics*.

**Grappling with the Multifaceted World of the DNA Damage Response** Antonio Porro, 2017-01-10 DNA damage is a major threat to genomic integrity and cell survival. It can arise both spontaneously and in response to exogenous agents. DNA damage can attack most parts of the DNA structure, ranging from minor and major chemical modifications to single strand breaks (SSBs) and gaps to full double strand breaks (DSBs). If DNA injuries are mis-repaired or unrepaired, they may ultimately result in mutations or wider scale genome aberrations that threaten cell homeostasis. Consequently, the cells elicit an elaborate signalling network known as the DNA damage response (DDR) to detect and repair these cytotoxic lesions. This Research Topic was aimed at comprehensive investigations of basic and novel mechanisms that underlie the DNA damage response in eukaryotes.

**Faith, War, and Violence** Gabriel R. Ricci, 2014-09-22 Faith, War, and Violence analyzes the age-old links between religion and violence perpetrated in the name of God and the role religion performs in politically infusing the state with romantic spiritualism. The volume examines instances of this phenomenon from ancient Rome to the modern day; it finds that religion-inspired violence is not restricted to Abrahamic faiths or to one geographic region. The fact that symbolically charged religious violence has destructive consequences is not lost on contributors to Faith, War, and Violence. Among the subjects tackled are the ideological and religious foundations that inspired the founders of Al Qaeda and its role in the Arab Spring, the long history of religious conflict in Ireland known as the Troubles, Sikh extremism, and the evolution of the Christian approach to war. As the

contributors demonstrate in Western societies the unity of religious fervor and warmongering stretches from Constantine's incorporation of Christian symbols into Roman army flags to slogans like Gott mit uns God is with us which appeared on the belt buckles of German soldiers in World War I. In recent years George W. Bush declared the war on terror a crusade and his speechwriter David Frum coined the religiously inspired term Axis of Evil to describe Iraq and other countries opposing the United States. **Smart Computing and Communication** Meikang Qiu, 2018-01-17. This book constitutes the refereed proceedings of the Second International Conference on Smart Computing and Communications SmartCom 2017 held in Shenzhen China in December 2017. The 43 papers presented in this volume were carefully reviewed and selected from 116 submissions. They deal with topics from smart data to smart communications smart cloud computing and smart security.

**Europe and Iran** Cornelius Adebahr, 2017-04-21. The EU's approach to Iran has emerged as one of the few successes of European foreign policy. Still its role in international negotiations from 2003 as much as its broader approach to Iran are generally poorly appreciated by policy makers in Europe the United States and around the world. This book aims to explain the specifics of the EU's approach to Iran taking into account both the complexity of European foreign policy in particular within transatlantic relations and Iran's aspired place in the international order. It informs the reader about the special negotiation format that included a number of world powers as well as multilateral bodies such as the International Atomic Energy Agency IAEA and the UN Security Council. Furthermore it provides an outlook on European post nuclear deal strategies and offers conclusions on the effectiveness of Europe's multilateral approach to foreign policy. By looking at the EU's diplomatic activities towards Iran over more than a decade the book focuses on Europe's actorness in international politics. This text will be of key interest to scholars students and practitioners involved or interested in the European Union Iran U.S. foreign policy as well as Foreign and Security policy including sanctions policy and more broadly to European Politics Middle East studies and international relations. **MEI.** Organisation for Economic Co-operation and Development, 2013.
