

Fact Sheet: **Medicaid Level of Care Determination**

What is the Medicaid Nursing Facility Level of Care Determination (LOCD)?

The Level of Care Determination (LOCD) is the process the Michigan Medicaid program uses to decide if a person needs the kind of care provided in a nursing home or the services of two programs (MI Choice and PACE) that help people who need long term care but want to remain in the community.

When does a person need an LOCD?

- When a person wants to be admitted to a nursing home, the MI Choice program, or the Program for All-Inclusive Care for the Elderly (PACE) and needs Medicaid to pay for his or her long term care.
- When a person already lives in a nursing home and becomes eligible for Medicaid.
- When a person's health improves or health insurance coverage changes.

How does a person qualify for Medicaid services?

The LOCD looks at a person's abilities in seven areas (sometimes referred to as "domains"). The areas include how the person manages daily activities like getting in and out of bed, using the bathroom, and eating. It also considers whether the person has short-term memory loss, needs help in making decisions, or has certain treatments or medical conditions. If a person meets the requirements under any one of the seven areas, she or he is medically eligible for Medicaid services.

What if a person does not qualify under one of the seven areas?

If you think you need nursing home care or services from MI Choice or PACE but are told you don't qualify under any of the seven areas, there are three options.
