Practice Test for NLC

Abstract: This is an abstract of a 2008 FICD or FICPA member's letter sent to National Society of Environmental Justice during a 2008 National meeting on the topic.

Efficient ways that companies give benefits could reduce net gross compensation, and their shareholders would like that. Some research indicates that offering financial health insurance reduces financial stressors, improves work habits and overall job content, and thereby is associated with higher wages. But what about the other side of the coin? What if companies are able to reduce their net gross pay, and still attract, engage and motivate employees, and even reduce turnover?
