Laboratory Manual of Medicinal Chemistry III Dr. Niranjan S. Mahajan, Dr. Shrinivas D. Joshi, Dr. T. Prabha, Mr. Shrikrishna S. Maske, We are very pleased to put forth the Laboratory Manual of Medicinal Chemistry III. This manual is prepared as per PCI B Pharm course regulations 2014 and is divided into three sections for laboratory techniques, determination of oil values and preparations of organic compounds. The methods of all the experiments are added from the recent research papers so that the advancement in the methods or apparatus can be addressed. This manual is designed for outcome based education and each experiment is arranged in a uniform way such as practical significance, practical outcomes, PrOs, and its mapping with course outcomes, theory, resources, used procedure, precautions, observations, result, conclusion, references, and synopsis questions. Each experiment offers an opportunity to perform practical work allowing students to gain proficiency in effectively managing equipment, handling glassware, chemicals, and reagents, and writing analytical reports. In addition, questions are provided at the end of the experiments to enhance students' knowledge which will be beneficial for them as they pursue higher studies. During the laboratory period, you will have to multitask while you are doing experiments. It is essential to document properly what you do and what you observe while doing the practical. Always plan your work ahead and think about what you are doing, why you are doing it, what is happening, and what you can conclude from your experiment. We acknowledge the help and co-operation extended by various persons in bringing out this manual. We are highly indebted to the authors of various books and articles mentioned in the reference which became a major source of information for writing this manual.
