Design Sprint Richard Banfield, C. Todd Lombardo, Trace Wax, 2015-09-28 With more than 500 new apps entering the market every day, what does it take to build a successful digital product? You can greatly reduce your risk of failure with design sprints, a process that enables your team to prototype and test a digital product idea within a week. This practical guide shows you exactly what a design sprint involves and how you can incorporate the process into your organization. Design sprints not only let you test digital product ideas before you pour too many resources into a project, they also help everyone get on board, whether they're team members, decision makers or potential users. You'll know within days whether a particular product idea is worth pursuing. Design sprints enable you to clarify the problem at hand and identify the needs of potential users. Explore solutions through brainstorming and sketching exercises. Distill your ideas into one or two solutions that you can test. Prototype your solution and bring it to life. Test the prototype with people who would use it.

AI Development and the 'Fuzzy Logic' of Chinese Cyber Security and Data Laws Max Parasol, 2021-12-16 The book examines the extent to which Chinese cyber and network security laws and policies act as a constraint on the emergence of Chinese entrepreneurialism and innovation. The book surveys the globalised R&D networks and how the increasing use of open source platforms by leading Chinese AI firms during 2017-2020 exacerbated the apparent

contradiction between Network Sovereignty and Chinese innovation The drafting of the Cyber Security Law did not anticipate the changing nature of globalised AI innovation It is argued that the deliberate deployment of what the book refers to as fuzzy logic in drafting the Cyber Security Law allowed regulators to subsequently interpret key terms regarding data in that Law in a fluid and flexible fashion to benefit Chinese innovation
