Intuition and Concept Richard A. Smyth,1959     *Kant and Non-Conceptual Content* Dietmar Heidemann,2014-06-11

Conceptualism is the view that cognizers can have mental representations of the world only if they possess the adequate concepts by means of which they can specify what they represent By contrast non conceptualism is the view that mental representations of the world do not necessarily presuppose concepts by means of which the content of these representations can be specified thus cognizers can have mental representations of the world that are non conceptual Consequently if conceptualism is true then non conceptualism must be false and vice versa This incompatibility makes the current debate over conceptualism and non conceptualism a fundamental controversy since the range of conceptual capacities that cognizers have certainly has an impact on their mental representations of the world on how sense perception is structured and how external world beliefs are justified Conceptualists and non conceptualists alike refer to Kant as the major authoritative reference point from which they start and develop their arguments The appeal to Kant attempts to pave the way for a robust answer to the question of whether or not there is non conceptual content Since the incompatibility of the conceptualist and non conceptualist readings of Kant indicate a paradigm case hopes have risen that the answer to the question of whether Kant is a conceptualist or a non conceptualist might settle the contemporary controversy across the board This volume searches for that answer This book is based on a special issue of the International Journal of Philosophical Studies

renowned scholars explore a rich and complex philosophical movement Logic as the Science of the Pure Concept Benedetto Croce,1917 Kant on Intuition Stephen R. Palmquist,2018-11-08 Kant on Intuition Western and Asian Perspectives on Transcendental Idealism consists of 20 chapters many of which feature engagements between Kant and various Asian philosophers Key themes include the nature of human intuition not only as theoretical pure sensible and possibly intellectual but also as relevant to Kant s practical philosophy aesthetics the sublime and even mysticism the status of Kant s idealism realism and Kant s notion of an object Roughly half of the chapters take a stance on the recent conceptualism non conceptualism debate The chapters are organized into four parts each with five chapters Part I explores themes relating primarily to the early sections of Kant s first Critique three chapters focus mainly on Kant s theory of the forms of intuition and or formal intuition especially as illustrated by geometry while two examine the broader role of intuition in transcendental idealism Part II continues to examine themes from the Aesthetic but shifts the main focus to the Transcendental Analytic where the key question challenging interpreters is to determine whether intuition via sensibility is ever capable of operating independently from conception via understanding each contributor offers a defense of either the conceptualist or the non conceptualist readings of Kant s text Part III includes three chapters that explore the relevance of intuition to Kant s theory of the sublime followed by two that examine challenges that Asian philosophers have raised against Kant s theory of intuition particularly as it relates to our experience of the supersensible Finally Part IV concludes the book with five chapters that explore a range of resonances between Kant and various Asian philosophers and philosophical ideas
