The Fifth Edition has an improved focus on decision making and managerial applications within the structure of an organization. **Managerial Economics and Organizational Architecture** James A. Brickley, Clifford W. Smith, Jerold L. Zimmerman, 2004  
This approach to managerial economics takes models from recent economic research and applies them to the internal structure of the firm. After teaching basic applied economics, the authors look inside the firm and apply this analysis to management decision making. The general model used for this application is organizational architecture, which consists of three aspects of corporate organization: the assignment of decision rights within the company, methods of rewarding individuals, and the structure of systems to evaluate the performance of both individuals and business units. These three elements must balance in an organization. **EBOOK: Macroeconomics** Rudiger Dornbusch, Stanley Fischer, Richard Startz, 2014-02-16  
Dornbusch, Fischer, and Startz has been a long-standing leading intermediate macroeconomic theory text since its introduction in 1978. This revision retains most of the text's traditional features, including a middle-of-the-road approach and very current research, while updating and simplifying the exposition. A balanced approach explains both the potential and limitations of economic policy. Macroeconomics employs a model-based approach to macroeconomic analysis and demonstrates how various models are connected with the goal of giving students the capacity to analyze current economic issues in the context of an economic frame of reference. The only pre-requisite continues to be principles of economics. **EBOOK: Advanced Macroeconomics** ROMER, 2018-02-22  
**EBOOK: Advanced Macroeconomics** Ebook: Essentials of Economics Stanley Brue, Campbell McConnell, 2014-10-16

**Managerial Economics & Organizational Architecture** James A. Brickley, Clifford Smith, Jerold L. Zimmerman, 2007 With two distinct objectives this text's approach to managerial economics takes models from recent economics research and applies the research to the internal structure of a firm After teaching basic applied economics the authors look inside the firm and apply this analysis to management decision making Authors Brickley Smith and Zimmerman contend that organizational architecture consists of three aspects of corporate organization the assignment of decision rights within the company methods of rewarding individuals the structure of systems to evaluate the performance of both individuals and business units These three components can be likened to a stool with three legs If one of the legs is shorter the stool is out of balance These three elements must be in balance in the organization as well
