The diagram illustrates the experimental setup. A participant is seated at a table, looking at a screen. The screen displays a sequence of stimuli: a fixation cross, a target stimulus, and a response stimulus. The participant's response is recorded. The diagram shows the timing and components of the experiment, including the presentation of the stimuli and the recording of the response.

Nuclear Deterrence And Global Security In Transition David Goldfischer, 2019-04-08 This book contains papers presented at a conference held at the University of California's Institute on Global Conflict and Cooperation in 1991. The papers reflect the spectrum of thought in the expert community that is likely to frame the policy debate over the future of nuclear deterrence.

America's First General Staff John Trost Kuehn, 2017-10-15 The General Board of the Navy in existence from 1900 to 1950 was a uniquely American and unparalleled strategic planning organization. As John T. Kuehn shows, this was the United States' first modern general staff in peacetime as well as the nexus for naval thought and strategic thinking. The Board's creation reflected the reformist spirit of the era that also gave birth to the Army War College, the Army General Staff, and the Chief of Naval Operations. As such, the General Board and its mission also reflected an attempt to reconcile the primacy of civilian control of the military with an increasing need for more formal military and naval planning establishments, processes, and methods. Thus, the General Board's very name reflected the idea shared by both corporate America and naval tradition that challenges and problems could be met with special temporary organizational bodies. By the 1920s, the General Board had become a permanent feature of the Navy and was regarded as the premier strategic think tank for advice to the Secretary of the Navy. Evolving over the course of its existence, the Board developed into a bona fide institutional component atop the service's hierarchy. Kuehn highlights how this small body, wielding immense influence over the span of its organizational life, was an innovative, progressive, and productive force for the security of the United States in peace and for naval success in war. The service of the men comprising the Board is little known, but their collaborative ethos should serve as a model for their modern counterparts. Kuehn's organizational history of the General Board provides context on the complexities and turbulence involved in building the modern Navy that transitioned over time from coal and sail to nuclear-powered warships. *America's First General Staff* offers the first single-volume history of the General Board of the Navy as well as an analysis of the U.S. Navy during periods of great change in both peace and war.

Distributed Space Missions for Earth System Monitoring Marco D'Errico, 2012-09-14 This title analyzes distributed Earth observation missions from different perspectives. In particular, the issues arising when the payloads are distributed on different satellites are considered from both the theoretical and practical points of view. Moreover, the problems of designing, measuring, and controlling relative trajectories are thoroughly presented in relation to theory and applicable technologies. Then, the technological challenges to design satellites able to support such missions are tackled. An ample and detailed description of missions and studies complements the book subject.

Principles of Global Security John D. Steinbruner, 2000-04 From the earliest human records, warfare has been both an organizing focus and a prime source of political motivation. Countless battles have been fought in the course of colonizing the planet, and the experience has created a legacy of military confrontation that many people consider immutable. Since preparations for war and the occasional conduct of it have been

central preoccupations for virtually all the major states throughout time it is widely assumed that the pattern is rooted in human nature and will endure indefinitely But contemporary civilization is undergoing a monumental transformation affecting its most basic features The combined effects of information technology population dynamics and the globalization of economic activity are altering some of the critical operating conditions of human societies and appear to be inducing a new pattern of interaction Correspondingly fundamental changes in the practice of war or what is now more politely called international security can be expected to follow Principles of Global Security anticipates the major implications of this massive transformation for security policy John D Steinbruner one of the nation s leading specialists on defense issues identifies formative problems and organizing principles relating to the predictable issues of security He examines in sequence how the configuration of nuclear and conventional forces might be affected how the problems of communal violence and dangers of technical proliferation might be managed and how security relationships among the major states might be altered One of the fundamental implications of globalization in a post cold war environment is a shift in security policy from deterrence to reassurance from active confrontation to cooperative engagement Without an opponent to justify preparation for large scale traditional missions nations must establish safer and less volatile patterns of deployment Maintaining global security in the twenty first century calls for a reconfiguration of basic relationships among historical opponents as well as revisions in military practices This visionary work will stimulate productive thinking among policymakers seeking to reshape the legacies of the cold war with a new conceptualization of international security
