

**TO INVESTIGATE THE PROCESS OF MEIOSIS**

Organisms produced by sexual reproduction are truly new organisms. They have different sets of genes from their parents. The gametes formed by meiosis are just for the purpose of sexual reproduction. Gametes cannot grow into another organism until they fuse with another gamete to form a zygote. When the zygote forms, it is genetically unique.

Genetic variation allows a species to have a better chance of adapting to and surviving sudden changes in the environment. No two individuals in a sexually reproducing population are exactly the same. Meiosis during sexual reproduction therefore ensures maximum genetic variation and improved the chances of a species' survival.

Source: Life Sciences Explained Grade 12

1. Study the electron micrographs showing various phases of meiosis

1.1 State the places where this process will take place in human females.

## Life Science Pgdrd12 Sep2014:

*Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges*

Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications. The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets. These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic. In response a series of international discussions on the nature of dual use life science arose. These discussions addressed the complex social, technical, political, security and ethical issues related to dual use research. This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives

**Social**

**Sciences and Interdisciplinary Behavior** Ford Lumban Gaol, Fenny Hutagalung, Nailya Bagautdinova, Lenar

Safiullin, 2016-09-19 Social Sciences and Interdisciplinary Behavior contains papers that were originally presented at the 4th International Congress on Interdisciplinary Behavior and Social Science 2015 ICIBSoS 2015 held 22-23 October 2015 at The Institute of Management Economics and Finance of the Kazan Federal University Kazan Russia and 7-8 November 2015 in Arya Duta Hotel Jakarta Indonesia. The contributions deal with various interdisciplinary research topics particularly in the fields of social sciences education, economics and arts. The papers focus especially on such topics as language, cultural studies, economics, behavior studies, political sciences, media and communication, psychology and human development

**Global**

guidance framework for the responsible use of the life sciences, 2022-09-13 The framework aims to provide global perspectives on principles, tools and mechanisms to support Member States and relevant stakeholders to mitigate and prevent biorisks and govern dual use research. The framework adopts the One health approach and focuses on the role that responsible life sciences research can play in preventing and mitigating risks caused by accidents, inadvertent or deliberate misuse with the intention to cause harm to humans, nonhuman animals, plants and agriculture and the environment. The framework is primarily intended for those who have responsibilities in the governance of biorisks such as policy makers and regulators in charge of developing national policies to harness the potential benefits of the life sciences while constraining their risks. The framework is also directed towards scientists and research institutions, educators, trainers, project management staff, funding bodies, publishers, editors, the private sector and all relevant stakeholders that are part of the research life cycle. The governance of biorisks is an issue that should engage all countries although countries will have different contexts, needs and starting points. Mitigating these risks will require individual and collective actions among different stakeholders and disciplines. Mitigating biorisks and governing dual use research is a shared responsibility.

**Hope in Health** Alan Petersen, 2015-05-27 Health professionals have shown a growing interest in the therapeutic value

of hope in recent years However hope has been examined mainly from psychological and biomedical perspectives Importantly Hope in Health explores how hope manifests and is sustained in various arenas of health medicine and healthcare

Nutrition Lori A. Smolin,Mary B. Grosvenor,2019-01-14 Nutrition Science and Applications 4th Edition helps students develop the scientific understanding to support their personal and professional decisions Using a critical thinking approach Smolin brings nutrition out of the classroom and allows students to apply the logic of science to their own nutrition concerns both as consumers and as future scientists and health professionals
