Open Source Approaches in Spatial Data Handling Brent Hall, Michael G. Leahy, 2008-09-27 The role open source geospatial software plays in data handling within the spatial information technology industry is the overarching theme of the book. It also examines new tools and applications for those already using OS approaches to software development [Online Maps with APIs and WebServices](#) Michael P. Peterson, 2012-03-30

The Internet has become the major form of map delivery. The current presentation of maps is based on the use of online services. This session examines developments related to online methods of map delivery particularly Application Programmer Interfaces APIs and MapServices in general including Google Maps API and similar services. Map mashups have had a major impact on how spatial information is presented. The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world. Overlaying features on top of these maps provides a frame of reference for the map user. A particular advantage for thematic mapping is the ability to spatially reference thematic data. **Human Machine Interaction** Inaki Maurtua, 2012-01-25 In this book the reader will find a set of papers divided into two sections. The first section presents different proposals focused on the human machine interaction development process. The second section is devoted to different aspects of interaction with a special emphasis on the physical interaction.
