Advanced Topics in Fuzzy Graph Theory John N. Mordeson, Sunil Mathew, 2018-12-13 This book builds on two recently published books by the same authors on fuzzy graph theory. Continuing in their tradition, it provides readers with an extensive set of tools for applying fuzzy mathematics and graph theory to social problems such as human trafficking and illegal immigration. Further, it especially focuses on advanced concepts such as connectivity and Wiener indices in fuzzy graphs, distance operations on fuzzy graphs involving t-norms, and the application of dialectic synthesis in fuzzy graph theory. Each chapter also discusses a number of key representative applications. Given its approach, the book provides readers with an authoritative, self-contained guide to, and at the same time, an inspiring read on the theory and modern applications of fuzzy graphs. For newcomers, the book also includes a brief introduction to fuzzy sets, fuzzy relations, and fuzzy graphs.

Advanced Studies in Efficient Environmental Design and City Planning Ferdinando Trapani, Nabil Mohareb, Federica Rosso, Denia Kolokotsa, Sreetheran

Maruthaveeran, Mahmoud Ghoneem, 2021-09-24 This book explains how learning from past mistakes in urban design can help to enhance sustainable cities and how the principles of Green Urbanism can yield more resilient urban settlements. Environmental design is a fundamental principle in shaping cities. However, environmental challenges like increased resource consumption, water degradation, and waste-related issues are among the greatest problems now facing humanity, which is why these issues need to be considered with regard to smart cities, either for the development of new urban centers or for the transformation of existing cities. The book not only discusses the importance of integrating sustainability principles in the urban design process but also demonstrates their application to the development of sustainable cities. As such, the book offers essential information and a source of inspiration for all those who want to build more sustainable cities.
