3	Moderate	3	Moderate	Moderate		3	
4	High	4	High	High		4	

HISTORY: Documentation of history includes CC, HPI, ROS, and PFH.

- ☐ **Internal History:** Subsequent hospital care only requires documentation of new history since last encounter.
- ☐ **Unstable/Unstable History:** Document reason. For example, "Further history was unstable/unstable because <...>."

EXAMINATION: Document specific abnormal, unexpected, and adverse negative findings. A collection of negative or normal or sufficient for normal findings. Extent of exam documented depends on PP.

MEDICAL DECISION-MAKING: MDGM can be viewed as the outcome of a cognitive process that leads to the selection of a course of action to diagnose or treat a patient. There are 3 distinct components to MDGM: number of problems, data reviewed/ordered, and risk. The first 2 are quantified; risk is up to the health-care professional to determine. To qualify for a given type of MDGM, 2 of the 3 elements must be met or exceeded.

TIME: For visits dominated by counseling or coordinating care, document total face-to-face time (disruptive) or visit (face-to-face) and that >50% of total time was dominated by counseling or coordinating care. In less of key components, time can be used to determine L/N level: <10% was spent counseling and coordinating care. Time is counted only by the reporting/health-care professional. Documentation requirements: "I personally spent a total time of <...> minutes in the care of this patient; of that, <...> minutes was spent in counseling and coordinating care face-to-face."

Evaluation And Management Guidelines 2010

JL Elias

Evaluation And Management Guidelines 2010:

Family Practice Guidelines, Third Edition Jill C. Cash, Cheryl A. Glass, 2014-02-10 Print CourseSmart **"Code of Massachusetts regulations, 2010"** ,2010 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 Healthy China: Deepening Health Reform in China The World Bank, World Health Organization, 2019-01-29 The report recommends that China maintain the goal and direction of its healthcare reform and continue the shift from its current hospital centric model that rewards volume and sales to one that is centered on primary care focused on improving the quality of basic health services and delivers high quality cost effective health services With 20 commissioned background studies more than 30 case studies visits to 21 provinces in China the report proposes practical concrete steps toward a value based integrated service model of healthcare financing and delivery including 1 Creating a new model of people centered quality integrated health care that strengthens primary care as the core of the health system This new care model is organized around the health needs of individuals and families and is integrated with higher level care and social services 2 Continuously improve health care quality establish an effective coordination mechanism and actively engage all stakeholders and professional bodies to oversee improvements in quality and performance 3 Empowering patients with knowledge and understanding of health services so that there is more trust in the system and patients are actively engaged in their healthcare decisions 4 Reforming public hospitals so that they focus on complicated cases and delegate routine care to primary care providers 5 Changing incentives for providers so they are rewarded for good patient health outcomes instead of the number of medical procedures used or drugs sold 6 Boosting the status of the health workforce especially primary care providers so they are better paid and supported to ensure a competent health workforce aligned with the new delivery system 7 Allowing qualified private health providers to deliver cost effective services and compete on a level playing field with the public sector with the right regulatory oversight and 8 Prioritizing public investments according to the burden of disease where people live and the kind of care people need on a daily basis
