**Differential Equations and Their Applications** Martin Braun,2013-11-27 There are two major changes in the Fourth Edition of Differential Equations and Their Applications The first concerns the computer programs in this text In keeping with recent trends in computer science we have replaced all the APL programs with Pascal and C programs The Pascal programs appear in the text in place of the APL programs where they are followed by the Fortran programs while the C programs appear in Appendix C Mathematics is playing an ever more important role in the physical and biological sciences provoking a blurring of boundaries between scientific disciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics This renewal of interest both in research and teaching has led to the establishment of the series Texts in Applied Mathematics TAM The development of new courses is a natural consequence of a high level of excitement on the research frontiers newer techniques such as numerical and symbolic computer systems dynamical systems and chaos mix with and reinforce the traditional methods of applied mathematics Thus the purpose of this textbook series is to meet the current and future needs of these advances and encourage the teaching of new courses TAM will publish textbooks suitable for use in advanced undergraduate and beginning graduate courses and will complement the Applied Mathematical Sciences AMS series which will focus on advanced textbooks and research level monographs
