**Interest in Mathematics and Science Learning** Ann Renninger, Martina Nieswandt, Suzanne Hidi, 2015-04-19 Interest in Mathematics and Science Learning edited by K Ann Renninger, Martin Nieswandt and Suzanne Hidi is the first volume to assemble findings on the role of interest in mathematics and science learning. As the contributors illuminate across the volume's 22 chapters, interest provides a critical bridge between cognition and affect in learning and development. This volume will be useful to educators, researchers, and policy makers, especially those whose focus is mathematics, science, and technology education.

**The Wiley Handbook of Early Childhood Development Programs, Practices, and Policies** Elizabeth Votruba-Drzal, Eric Dearing, 2017-04-17 The first and only comprehensive review of current early childhood development theory, practices, policies, and the science behind them. This unique and important book provides a comprehensive overview of the current theory, practices, and policies in early childhood development within the contexts of family, school, and community and society at large. Moreover, it synthesizes scientifically rigorous research from an array of disciplines in an effort to identify the most effective strategies for promoting early childhood development. Research into childhood development is booming and the scientific knowledge base concerning early childhood development is now greater than that of any other stage of the human life span. At the same time, efforts to apply that knowledge to early childhood practices, programs, and policies have never been greater or more urgent. Yet, surprisingly, until *The Handbook of Early Childhood Development Programs, Practices, and Policies*, there was no comprehensive critical review of the applied science in the field. The book begins with in-depth coverage of child and family approaches. From there, it moves onto a consideration of school and community-based strategies. It concludes with a discussion of current social policies on health and development in early childhood and their implications. Provides a comprehensive overview of the state of the knowledge base along with guidance for the future of the field. Examines the underlying theory and basic science guiding efforts to promote early childhood development. Critically reviews the strength of the empirical support for individual practices, programs, and policies. Explores key opportunities and barriers policymakers and practitioners face when implementing various approaches. Pays particular attention to socioeconomically disadvantaged and other disenfranchised populations. *The Handbook of Early Childhood Development Programs, Practices, and Policies* is a valuable resource for practitioners, scholars, graduate students, and advanced undergraduate students across the social sciences who are interested in strengthening their understanding of current strategies for promoting early childhood development and the science informing those strategies.

**Statistics for Innovation IV** Enrico di Bella, Vincenzo Gioia, Corrado Lagazio, Susanna Zaccarin, 2025-06-16 This book presents peer-reviewed short papers on methodological and applied statistical research presented at the Italian Statistical Society's international conference on Statistics for Innovation SIS 2025 held in Genoa, Italy, June 16-18, 2025.
