send their valuable suggestions for further improvement of this book *Blood Cells* Barbara J. Bain, 2008-04-15 *Blood Cells* has been written with both the practising haematologist and the trainee in mind. It aims to provide a guide for use in the diagnostic haematology laboratory covering methods of collection of blood specimens, blood film preparation and staining, the principles of manual and automated blood counts and the assessment of the morphological features of blood cells.

The practising haematologist should find this book sufficiently comprehensive to be a reference source while at the same time the trainee haematologist and biomedical scientist should find it a straightforward and practical bench manual. Enables both the haematologist and laboratory scientist to identify blood cell features from the most common to the more obscure. Provides essential information on methods of collection, blood film preparation and staining together with the principles of manual and automated blood counts. Completely revised and updated incorporating much newly published information now includes advice on further tests when a specific diagnosis is suspected. Four hundred high quality photographs to aid with blood cell identification. Highlights the purpose and clinical relevance of haematology laboratory tests throughout. [World Malaria Report 2008](#) World Health Organization, 2008. This publication uses data from routine surveillance and household surveys to assess recent progress towards targets set by the Roll Back Malaria Partnership within the framework of the Millennium Development Goals. In 5 main chapters, 30 country profiles and 7 annexes, the report describes the estimated burden of disease in each of the 109 countries and territories with malaria in 2006, how WHO recommended policies and strategies on malaria control have been adopted by country, region and globally, the progress made in implementing control measures, the sources of funding for malaria control and recent evidence from specific countries that prevention and treatment can as expected reduce malaria cases and deaths.
