Failure Vicki E. Alger, 2016-07-01 A comprehensive account and frank assessment of federal involvement in education is long overdue Education policy expert Vicki E Alger remedies this deficiency with her book Failure The Federal Miseducation of America's Children As its title indicates Failure makes no effort to sugar coat its findings Created in 1979 after a lobbying campaign that spanned generations the Department of Education has failed to live up to its promises Federal involvement whether related to testing funding or academic curricula has failed to abide by the Constitution's implication that education must

remain the domain only of state and local governments and private institutions Most of all the central government s pervasive meddling in education has failed America s school children and their parents Education policy has long been mired in controversies often with opposing sides missing the mark Failure helps us step back from the skirmish du jour and redirects our focus to the big picture showing us what s gone wrong over the decades and the institutional causes of these failures It also offers a bold blueprint for returning the federal government to its constitutional role and for cultivating an educational system that meets the needs of students and parents rather than bureaucrats Concerned citizens of every stripe will benefit from Failure s history of federal education policy its brutally honest report card for the Department of Education its look at education systems across the globe and its ambitious policy recommendations Failure might even succeed in reframing the way the federal education establishment thinks about education policy

Measuring National Innovation Performance Frane

Adam, 2013-10-09 This book provides a critical re examination of the Innovation Union Scoreboard IUS as the main tool used by the European Commission and other policy making bodies to measure national innovation capacity Given that contemporary societies and economies are to a great extent characterised by the processes of production dissemination and application re combination of knowledge the accurate monitoring and measurement of R D efficiency and innovation performance on national regional and firm level are of outmost importance The contextual reconstruction of the model of indicators used by IUS reveals that the accuracy and validity of measurement are not satisfactory and that substantial modifications of metrics are needed to achieve stronger theoretical significance and policy relevance In this work the epistemic turn is emphasised and offered as an alternative namely in the sense of the shift from a mechanistic positivist orientation toward a more reflective and contextual post positivist approach
