Neuropsychological Interventions for Children - Volume 1 Caroline de Oliveira Cardoso, Natália Martins Dias, 2024-04-04 This book is the first of two volumes that aim to serve as a comprehensive guide for professionals working with neuropsychological interventions especially designed for children This first volume presents the theoretical foundations tips and guidelines for neuropsychologists to develop different interventions such as stimulation and early intervention with a focus on promoting neuropsychological health habilitation appropriate for work with neurodevelopment disorders and rehabilitation in cases of structural alterations In this sense it reflects the editors concern to provide material with practical tips but theoretically grounded and truly useful to professionals in clinical and also school contexts This first volume is divided into two parts The first addresses the theoretical and practical foundations of child neuropsychological assessment and intervention

Neuropsychological assessment is discussed with a focus on its role in guiding intervention. Also different types of interventions are presented and a taxonomy is offered according to its differential objectives of promotion or remediation and the target population, typical development, functional or structural alterations of the Nervous System, leading to the suggestion of three types of interventions in neuropsychology in both clinical and school contexts: 1 Early preventive Intervention, 2 Habilitation, and 3 Rehabilitation. Cognitive stimulation in different contexts such as school, family, and clinical is also discussed, exploring how teachers and parents can also collaborate in intervention processes, expanding the possibilities for action beyond the clinical context. A section concludes by addressing the importance of the feedback and the neuropsychological assessment report. The second part focuses specifically on stimulation and rehabilitation, offering chapters that target specific skills such as attention, memory, executive functions, and academic skills, among others. The chapters summarize evidence, bring tips, and illustrate existing materials and programs in a continuous articulation between theory, evidence, practice. Originally published in Portuguese and now available in English, *Neuropsychological Interventions for Children*, Volumes 1 and 2, will be of interest to professionals working with neuropsychology in clinical and school contexts. It will also be useful in neuropsychology teaching contexts, specialization courses in neuropsychology and related areas, and for students and professionals in interface areas such as Psychology, Education, Speech Therapy, Occupational Therapy, among others. The translation of the original Portuguese version of this book into English was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.

Cognitive Psychology Karl Haberlandt, 1997. This revised second edition provides the reader with friendly orientation and a strong research base of the first edition, along with substantial updates in three key technical areas: neuroscience, action research, and neural networks. This book offers the latest research developments in imaging methods, declarative knowledge, associative learning, and implicit vs. explicit memory, and countless other topics. It fully integrates the important advances in cognitive psychology during the last decade into its presentation of traditional mainstream topics. Shows links to allied disciplines such as artificial intelligence, computational linguistics, and problem solving to add interest and context. For professionals in the field of psychology.

Software Applications: Concepts, Methodologies, Tools, and Applications Tiako, Pierre F., 2009-03-31. Includes articles in topic areas such as autonomic computing, operating system architectures, and open source software technologies and applications.

Cognition Margaret W. Matlin, 2004-08-03.
