## **Matthew Brandt Lakes And Reservoirs:**

**Lakes & Reservoirs**, 2014 INDIVIDUAL PHOTOGRAPHERS Matthew Brandt is an experimental photographer who works with different processes and materials to create images that are at once beautiful yet balanced with his artistic concept. Brandt has been known to use everything from bodily fluids to food to develop his photographs. Photographs from Matthew Brandt's Lakes and Reservoirs series were taken in the Western U.S. developed as C-prints and then submerged in water drawn from the body of water depicted for several days, weeks or months. As the water breaks down the emulsion, vivid colors and painterly passages emerge, making each photograph unique. Light, Paper, Process Virginia Heckert, 2015-04-14 From its beginnings, photography has been shaped by the desire to understand and explore the essence of the medium. Light Paper Process features the work of seven artists: Alison Rossiter, Marco Breuer, James Welling, Lisa Oppenheim, Chris McCaw, John Chiara, and Matthew Brandt, who investigate the possibilities of analog photography by finding innovative, surprising, and sometimes controversial ways to push light-sensitive photographic papers and chemical processing beyond their limits. A panoply of practices emerges in the work of these artists. Some customize cameras with special lenses or produce images on paper without a camera or film. Others load paper rather than film in the camera or create contact printing with sources of light other than the enlarger. While still others use expired photographic papers and extraneous materials such as dust and sweat selected to match the particular subject of the photograph. All of the artists share a willingness to embrace accident and chance. Trial and error contribute to an understanding of the materials and their potential, as do the attitudes of underlying curiosity and inventive interrogation. The act of making each image is like a performance with only the photographer present. The results are stunning. This lavish publication accompanies an eponymous exhibition on view at the J. Paul Getty Museum from April 14 to September 6, 2015. **Light and Lens** Robert Hirsch, 2012-09-10 Light: how to use today's digital technology to create compelling images and how to output and preserve images in the digital world. Explore the history, theory, and methods of digital image making. Light and Lens translates the enduring aesthetics of art photography into the digital realm. You'll view, capture, and think about images from a new perspective. Increase your ability to analyze, discuss, and write about your own work and the images of others. Learn with exercises and assignments by leading digital educators. Innovative techniques will train your eye to make the strongest visual statement. Solve visual problems and overcome image challenges. Whether you use a digital SLR or a point-and-shoot camera, you'll get new strategies to master composition, design, and light. View the full range of the digital terrain with stunning images and commentary by over 190 international artists. Robert Hirsch is a renowned photographer, educator, historian, and writer.
