By demonstrating how each of these threats evolved separately and then converged to form an ultra-dangerous composite threat, the book discusses the impact the threats pose and how the very technologies that created the problem can help solve it. *Cybercrime and Business* then offers viable strategies for how different types of businesses, from large multinationals to small start-ups, can respond to these threats to both minimize their losses and gain a competitive advantage. The book concludes by identifying future technological threats and how the models presented in the book can be applied to handling them. Demonstrates how to effectively handle corporate cyber security issues using case studies from a wide range of companies around the globe. Highlights the regulatory, economic, cultural, and demographic trends businesses encounter when facing security issues. Profiles corporate security issues in major industrialized, developing, and emerging countries throughout North America, Europe, Asia, Latin America, Africa, and the Middle East. **Cybersecurity Law** Jeff Kosseff, 2022-12-13 **CYBERSECURITY LAW** Learn to protect your clients with this definitive guide to cybersecurity law in this fully updated third edition. The Coming of Neo-Feudalism Joel Kotkin, 2020-05-12 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them
