Home Electrical Problems And Solutions:

Residential Electrical Troubleshooting Jesse Kuhlman, 2021-06-11 When Jesse Kuhlman started this guide his original intention was for it to be used by his own employees of Kuhlman Electric in Massachusetts and New Hampshire to refer to and learn from. Jesse takes the education of his company's employees very seriously and hoped to make them better field electricians. Being an effective troubleshooter is one of the more difficult things to teach an employee as it requires a lot of experience due to the many different issues one may come across. As he started to develop the guide, Jesse thought why not tweak it so it could be used by anyone who is interested. The potential audience includes everyone ranging from homeowners who are interested in electrical problems to field electricians looking to improve their skills. This guide covers troubleshooting situations that can be found in residential homes including Switches, GFCIs, Arc Fault circuit breakers, Electric Heat, Electrical Panels, Lighting, Basic HVAC systems, Low voltage doorbell cable, Cat6 wiring, Troubleshooting steps depending on situation, And much more. Jesse Kuhlman always said he learned the best from looking at diagrams and put many in this guide. They can be found throughout and should help the reader in further understanding the material. At the end of writing this guide, Jesse said if this guide helps even one person to be a better electrician, mission accomplished.
