LUBRICATION

The four-cycle power head is lubricated by a pressurized oil system which uses a separate oil reservoir. Do not mix oil with the fuel. The oil sump should be drained and refilled with two quarts of a good grade automotive oil, SAE 30, type MS every 100 hours of operation, and oil level checked daily. If motor is operated at temperatures below 22°F., SAE 10, MS oil should be used. The lubricating system uses a cartridge type oil filter and the element should be replaced when oil is changed.

Refer to Fig. H1 for location of the engine oil reservoir drain (D) and oil level indicator (C) plugs. The engine oil filter cap on early motors is located under shroud on rear, port side of power head. On later motors, filter cap is just behind the ignition distributor. The oil filter cartridge is located on starboard side of block and can be removed after removing shroud.

The lower unit gears and bearings are lubricated by oil contained in the gear case. The best available grade of SAE 30 outboard gear oil should be used. Gearcase capacity is 12 ounces. Drain the gear housing every 100 hours by removing the drain plug (P) and bleed plug (B). Refill

through drain plug hole (P) until the lubricant reaches level of bleed plug (B). Reinstall bleed and drain plugs securely, using new gaskets. Gearcase level should be checked each 10 hours of operation.

FUEL SYSTEM

The motor is equipped with two Tillotson model MD 1208 or C carburetors which must be identically adjusted and synchronized. Each carburetor supplies the fuel mixture for two of the four cylinders. An automotive di-

aphragm type fuel pump is mounted on carburetor cover board of engine and is driven by a camshaft lever.

CARBURETOR. Refer to Fig. H2 for an exploded view of carburetors. Normal initial setting for the idle mixture needle (12) is 1/4 turn open from the closed position. Carburetor is equipped with a fixed high-speed jet. Idle mixture and speed adjustments should be checked under load when engine is at operating temperature, and both carburetors adjusted alike.
