state and 111 bills have been passed in New York, Connecticut and Maryland that have expanded restrictions on magazines and capacity and made new licensing and registration procedures for gun buyers. In April the Senate introduced more legislation, including a bill to ban assault weapons and high capacity magazines, but it did not pass. The goal for gun control advocates, though, is a new federal ban on the AR-15 rifle, the most popular rifle from being made. Even federal gun control advocates are unlikely to support this bill. It is unlikely that the bill will pass. Destroying Surplus Weapons Sarah Meek, Noel Stott, 2003 This publication examines the experiences of South Africa and Lesotho in the disposal of surplus weapons and the management of small arms stocks. It seeks to highlight the lessons learned and benefits realised in terms of security development and economics in order to encourage other governments in Africa to carry out similar programmes.

Gun Control Wilbur Edel, 1995-04-30 Federal restrictions on the sale and possession of some firearms were introduced during Prohibition when illegal rumrunners battling for territorial rights commonly used machine guns to destroy the opposition. More sweeping legislation was not passed until 1968 and from that time on the struggle has been between pro and anti control forces with more controls created at state and local levels than at the federal level. However, the mood in Washington has turned and the question now is how the country can be weaned away from the violence that pervades every aspect of living from lawlessness to literature, entertainment and even children's toys. This book traces the history of these gun control measures from the early days to our own violent age. This is a study of a part of American history that deals not just with gun control as such but with basic concepts of personal liberty, government responsibility and the fear of tyranny. All three of these influenced the people who took up arms in the American Revolution and who for decades afterward resisted every effort of the central government to substitute a standing army for the armed militia of the states. As the nation grew in size and population the need for a standing army became apparent and the nature of the militia changed from that of a purely state organization to an adjunct of the regular army. Still, the view that private individuals were entitled to purchase and keep firearms for their personal use persisted. That this was not a constitutional right was made clear by the Supreme Court in a series of cases beginning as early as 1876. Federal restrictions on the sale and possession of some firearms were introduced during Prohibition when illegal rumrunners battling for territorial rights commonly used machine guns to destroy the opposition. More sweeping legislation was not passed until 1968 and from that time on the struggle has been between pro and anti control forces with more controls created at state and local levels than at the federal level. However, the mood in Washington has turned and the question now is how the country can be weaned from the violence that pervades every aspect of living from lawlessness to literature, entertainment and even children's toys.
