Melinda Lawson,2002 The Civil War is often credited with giving birth to the modern American state The demands of warfare led to the centralization of business and industry and to an unprecedented expansion of federal power But the Civil War did more than that as Melinda Lawson shows it brought about a change in American national identity redefining the relationship between the individual and the government Though much has been written about the Civil War and the making of the political and economic American nation this is the first comprehensive study of the role that the war played in the shaping of the cultural and ideological nation state In Patriot Fires Lawson explains how when threatened by the rebellious South the North came together as a nation and mobilized its populace for war With no formal government office to rally citizens the job of defining the war in patriotic terms fell largely to private individuals or associations each with their own motives and

methods Lawson explores how these interpreters of the war helped instill in Americans a new understanding of loyalty to country Through efforts such as sanitary fairs to promote the welfare of soldiers the war bond drives of Jay Cooke and the establishment of Union Leagues Northerners cultivated a new sense of patriotism rooted not just in the subjective American idea but in existing religious political and cultural values Moreover Democrats and Republicans Abolitionists and Abraham Lincoln created their own understandings of American patriotism and national identity raising debates over the meaning of the American idea to new heights Examining speeches pamphlets pageants sermons and assemblies Lawson shows how citizens and organizations constructed a new kind of nationalism based on a nation of Americans rather than a union of states a European styled nationalism grounded in history and tradition and celebrating the preeminence of the nation state Original in its insights and innovative in its approach Patriot Fires is an impressive work of cultural and intellectual history As America engages in new conflicts around the globe Lawson shows us that issues addressed by nation builders of the nineteenth century are relevant once again as the meaning of patriotism continues to be explored
